COMPANY PROFILE

Santee Cooper is South Carolina's state-owned electric and water utility. Known formally as the South Carolina Public Service Authority, Santee Cooper was created in 1934 as a rural electrification and public works project. Santee Cooper generated its first electricity in February 1942. The project saw the creation of lakes Marion and Moultrie, along with 40 miles of dams and dikes, and the world's highest single-lift navigation lock at the time.

Santee Cooper is a public-power provider and a source of electricity for approximately 2 million people in all 46 counties of South Carolina. Santee Cooper serves many residential and commercial customers directly in Berkeley, Georgetown, and Horry counties. Santee Cooper also supplies electricity to the state's 20 electric cooperatives, the cities of Bamberg and Georgetown, and many industrial customers including Joint Base Charleston, the Alabama Municipal Electric Authority, and the 10 member cities that form the Piedmont Municipal Power Agency.

Starting in 2002, a significant portion of the electricity supplied by Santee Cooper is generated at the Rainey Generating Station located in Anderson County, South Carolina. The Rainey Station generates electricity using pipeline natural gas as its fuel. For the sole purpose of supplying natural gas to the Rainey Station, Santee Cooper owns and operates a 2 mile long, 16 inch diameter pipeline. The pipeline originates with 0.3 miles in Hart County, GA, extending across the state border into Anderson County, SC with 1.7 miles, and ending at the Rainey Station.

COMMITMENT TO SAFETY, HEALTH AND ENVIRONMENT

Our company's mission is to be the state's leading resource for improving the quality of life for the people of South Carolina. One of the chief ways we do that is by protecting our environment. Our environmental efforts are core to our company's vision and beliefs. We are committed to.

- Compliance with all applicable federal, state, and local environmental statutes, regulations, enforceable agreements, and permits.

Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.

- Continual improvement in environmental performance, through proactively seeking ways to enhance compliance, promoting conservation and renewable energy initiatives, minimizing environmental risks, promoting pollution prevention, and dedicating personnel, equipment, training, and materials for the comprehensive Environmental Management System.

Santee Cooper has always played a major role in conserving and preserving our environment.

A portion of this power is produced using pipeline natural gas. Santee Cooper operates a 2.1 mile, 16 inch transmission pipeline originating in Hart County, GA and ending at the John S. Rainey Generating Station in Anderson County, SC.
