

ABOUT CITY OF CHANUTE

The City of Chanute owns and operates roughly 1/3 mile of transmission, and 94 miles of distribution mains from two town border stations, to gas consumers in and surrounding the city limits

WHAT DOES CITY OF CHANUTE DO IF A LEAK OCCURS?

To prepare for the event of a leak, pipeline companies regularly communicate, plan, and train with local emergency responders. Upon the notification of an incident or leak the pipeline company will immediately

dispatch trained personnel to assist emergency responders. Pipeline operators and emergency responders are trained to protect life, property, and facilities in the case of an emergency. Pipeline operators will also take steps to minimize the amount of product that leaks out and to isolate the pipeline emergency.

Natural Gas	1971	115

KANSAS
COUNTIES OF OPERATION:

Neosho

Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.

COMMITMENT TO SAFETY, HEALTH, & ENVIRONMENT

In support of their commitment to public awareness, damage prevention, and safety, some Kansas Municipalities have joined the Kansas Pipeline Association (KPA) program. Typically, these pipeline operators transport natural gas through distribution lines providing natural gas to service their customers. These operators odorize their natural gas with an odorant. Typical operating pressures for municipalities range from ounces to approximately 60 psi. While some municipalities may have lines with pressures exceeding 60 psi.
