

**COMPANY PROFILE**

Coffeyville Resources Crude Transportation, LLC is a subsidiary of CVR Energy, Inc, an independent petroleum refiner and marketer of high-value transportation fuels. CVR Energy's petroleum segment includes a complex full coking, medium-sour crude oil refinery with a nominal rated capacity of 115,000 barrels per calendar day (bpcd) operated by Coffeyville Resources Refining & Marketing, LLC in Coffeyville, Kansas, and a complex crude oil refinery with a nominal rated capacity of 70,000 bpcd operated by Wynnewood Refining Company, LLC in Wynnewood, Oklahoma. CVR Energy's subsidiaries also operate approximately 425 miles of active owned and leased pipelines, a maximum rated capacity of 206,500 bpcd pipeline owned and operated by joint ventures, approximately 125 crude oil transports, a network of strategically located crude oil gathering tank farms, and approximately 7 million barrels of owned and leased crude oil storage capacity.

Coffeyville Resources Crude Transportation can operate a maximum rated capacity of 206,500 bpcd crude oil through its gathering and pipeline trucking systems located in Bartlesville and Pauls Valley, Oklahoma, Plainville and Winfield, Kansas. The gathering system is comprised of more than 425 miles of active owned and leased pipelines and associated tankage and truck transportation facilities. The gathering business purchases crude from independent crude oil producers in Kansas, Missouri, Nebraska, Oklahoma, and Texas.

**CALL BEFORE YOU DIG**

Statistics indicate that damage from excavation-related activities is a leading cause of pipeline accidents. If you are a homeowner, farmer, excavator, or developer, we need your help in preventing pipeline emergencies.

**The Plan is Simple**

1. Call your state's One Call Center at least two working days before excavation is scheduled to begin.
2. Wait the required amount of time.
3. One of our trained technicians will mark the location of the pipeline at no cost to you.
4. Respect the line markers.
5. Dig with care.

**SIGNS OF A PETROLEUM PRODUCT RELEASE**

- Sight** - A pool of liquid on the ground near a pipeline, a rainbow sheen on water, a dense white cloud or fog over a pipeline, or discolored vegetation.
- Sound** - An unusual noise coming from the pipeline, like a hissing or roaring sound.
- Smell** - An unusual chemical odor, such as gas or oil.

**24-Hour Emergency Contact:**  
**1-800-982-4112**

Cowley	Wilson
Montgomery	

*Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.*

**WHAT TO DO IF A LEAK OCCURS**

- Leave the leak area immediately.
- Do not touch, breathe, or make contact with leaking liquids.
- Do not light a match, start an engine, use a telephone, switch light or do anything that may create a spark.
- From a safe location, call 9-1-1 or your local emergency response number and the pipeline company, 1-800-982-4112. Give your name, phone number, a description of the leak and its location.
- Warn others to stay away.
- Do not drive into a leak or vapor cloud area.

**PIPELINE MARKERS**

The U.S Department of Transportation (DOT) requires the use of signs to indicate the location of underground pipelines. Markers like these are located at road, railroad, and navigable waterway crossings. Markers are also posted along the pipeline right-of-way.

The markers display:

- The material transported in the pipeline
- The name of the pipeline operator
- A telephone number where the operator can be reached in the event of an emergency
