Website: www.dcpmidstream.com

The link between natural gas exploration and production and the end-use customer is known as the midstream segment of the natural gas industry. DCP Midstream, headquartered in Denver, Colorado, leads the midstream segment as one of the nation's natural gas gatherers, the largest natural gas liquids (NGLs) producer and the second largest NGL marketers. DCP Midstream operates in the two principal segments of the midstream natural gas industry: natural gas gathering, processing, transportation, marketing and storage; and NGL fractionation, transportation, marketing and trading. We gather raw natural gas through 62,000 miles of gathering pipeline in six of the major U.S. natural gas regions. Through our processing operations, we separate NGLs from the raw natural gas and "fractionate" the liquids into their individual ethane, propane, butane and natural gasoline components. DCP Midstream then sells its NGLs to a variety of customers, ranging from large, multi-national petrochemical and refining companies to small regional propane distributors. We store residue gas that results from processing in our 9.0 billion cubic foot storage facility, and sell it to both gas marketers and end-users,

including large industrial customers and natural gas and electric utilities.

COMMITMENT TO SAFETY, HEALTH & ENVIRONMENT

At DCP Midstream, we design, install, test, operate and maintain our pipelines to meet or exceed regulatory standards. We test our pipelines to withstand a higher pressure than encountered in daily use. Our employees receive regular, thorough training to safely operate and maintain our pipeline systems. As part of our ongoing damage prevention program, we patrol our pipeline right-of-way corridors by air and periodically on foot to spot potential safety problems, such as possible leaks or unauthorized construction.

DCP Midstream is committed to the safe operation of our pipelines and the protection of our employees, the public, and the environment.

For more information regarding DCP Midstream's emergency response plans, maps and procedures, please contact us by phone or mail at the address and phone number listed above.
