ABOUT EQUISTAR CHEMICALS, LP, A LYONDELL BASELL COMPANY

Equistar Chemicals, LP operates and maintains approximately 1,400 miles of pipelines in Texas and Louisiana. Our pipelines move products such as ethylene, propylene, butadiene, benzene, pyrolysis gasoline and hydrogen. We also transport feedstocks such as condensates, natural gasoline, butane, propane, ethane, natural gas, butylenes and raffinates.

Equistar's Pipeline Group also operates and maintains underground hydrocarbon storage facilities in Markham and Mont Belvieu, Texas. These storage facilities and the pipeline systems are controlled 24 hours a day from the company's Clear Lake facility. Pipeline employees are stationed at the storage facilities and at various sites along the pipeline system.

SAFETY AND OPERATIONS

Safety is a value at Equistar Pipelines, and we have a Goal Zero aspiration. This means an expectation for each of us as individuals to have zero injuries, zero incidents, zero non-compliant situations, zero defects and zero mistakes. Goal Zero is about behavior and our commitment to flawless execution in everything that we do.

Equistar's Pipeline Control Center has the capability to start and stop pumps and compressors along the pipeline, remotely open and close valves and the ability to isolate sections of pipeline or divert flows to other lines. The Control Center has advanced equipment to

ensure constant communications with the public and emergency responders is possible in the event of a man made or natural disaster.

The company works to ensure that its pipelines are protected and operating safely through:

- Pipeline markers along the entire lengths of our pipelines
- Adequate cathodic protection
- Completion of annual leak surveys
- Regular and frequent aerial inspections
- Participation in One-Call (811) programs to prevent damage.

PROTECTING THE PUBLIC AND THE ENVIRONMENT

Equistar's Public Awareness and Damage Prevention programs help ensure the safety of the communities in which we operate, and protect the environment from spills or releases.

Equistar Pipelines is committed to informing the public, officials and excavators on pertinent information including emergency contacts; incident prevention, and emergency response in accordance with the DOT's Public Awareness program, which is based on the American Petroleum Institute's Recommended Practice 1162 (API RP1162).

We are members of state One Call ("811") programs that notify us of excavations near our pipelines. These notifications allow us to properly mark the location of our lines before excavation activities begin.
