 St. James, LA 70086

LOCAP is a common carrier pipeline system operated by LOOP LLC. LOCAP transports crude oil from the LOOP Deepwater Port complex in Galliano, LA to the LOCAP St. James Terminal facility in St. James, LA.

The LOCAP pipeline system consists of a pump station, 48-inch pipeline and surface tanks. The 57.5 mile, 48-inch LOCAP pipeline originates at the LOOP Clovelly Dome Storage Terminal and transports crude oil via a booster station at Clovelly to the St. James Terminal where the oil is temporarily stored in one of ten above ground tanks for further distribution to refineries via other connecting pipeline systems.

COMMITMENT TO SAFETY, HEALTH & ENVIRONMENT

LOOP, as operator of LOCAP, is committed to the safe operation of the LOCAP pipeline system. The Company's Vision is to be the premier facility in the world for offloading, transporting, storing and delivering crude oil. Inherent to this Vision is LOOP's commitment to

maintain the highest standards for safety and reliability to protect the environment, the health of its employees, contract personnel, the public and its customers. To further its Vision, LOOP is committed to the operation of its facilities in compliance with all applicable rules and regulations.

A core component of LOOP's principles and beliefs is that safety and environmental performance is mandatory for success and comes first. In furtherance of these beliefs and principles, LOOP commits to provide an effective training program to ensure that employees and contractors understand the roles and responsibilities of individuals to facilitate safe and environmentally sound operations. LOOP maintains the safe operation of its pipeline through its integrity management program, routine inspections, preventive maintenance and testing programs, corrosion control program and training. While LOOP is committed to safe operation it also has procedures and a response organization in place to control, contain, and mitigate
