

ABOUT TALOS ENERGY VENTURES

Talos Energy Ventures (Talos), headquartered in Houston Texas, with offices in Lafayette La., is a Energy Company with operations mostly in the Federal Waters of the Gulf Of Mexico, we currently have 577 employees.

WHAT DOES TALOS ENERGY VENTURES DO IF A LEAK OCCURS?

To prepare for a response to a leak, Talos regularly communicates and plans with local emergency responders. Upon notification of an incident or leak, Talos will immediately dispatch trained personnel to assist emergency responders.

Talos pipeline operators are trained to protect life, environment, and property and will take steps to minimize the amount of product leak in the event of an emergency.

MAINTAINING SAFETY AND INTEGRITY OF PIPELINES

Talos invests significant time and capital maintaining the quality and integrity of its pipeline systems. Most active pipelines are monitored 24 hours a day, but Talos also utilizes aerial surveillance and on ground observers to identify potential dangers. In the event of a leak the pipeline will be isolated immediately by field personnel who are on site 24 hours a day, and who will call out emergency response personnel.

All Gas transmission and hazardous liquid pipeline operators have supplemental hazard and assessment programs known as Integrity Management Programs (IMPs).

PRODUCTS TRANSPORTED

Product: Crude Oil

Leak Type: Liquid

Vapors: Initially heavier than air and spread along ground and collect in low or confined areas. Vapors may travel to source of ignition and flash back. Explosion hazards indoors, outdoors or in sewers.
