COMMITMENT

Targa Resources Inc. (“Targa”) operates gas and hazardous liquid pipelines in south Louisiana and is committed to the protection of the public and the environment through the safe operation and maintenance of its pipeline systems. Qualified personnel are trained in emergency response activities and participate in drills and exercises reflecting various types of response levels and emergency scenarios.

Targa has committed the necessary resources to fully prepare and implement its emergency response plans and has obtained through contract the necessary private personnel and equipment to respond, to the maximum extent practicable, to a “worst case” discharge or substantial threat of such a discharge.

COMMUNICATIONS

Pipeline Control Centers located in Louisiana are used as a hub for communications in all emergency situations. On-site communications are conducted via cell phone, and/or portable radios and land lines.

INCIDENT COMMAND SYSTEM

An expandable Incident Command System is used by Targa during emergency situations. Depending upon the size and complexity of an incident, additional Company or contract personnel may be utilized, as necessary. Federal, state or local agencies may also be integrated into the Incident Command System through a Unified Command Structure.

EMERGENCY RESPONSE EQUIPMENT

Equipment and materials necessary for emergency response are kept at local Targa facilities. These materials may include: spill boom, sorbent materials, boats, motors, hand and power tools, pumps, hoses, personal protective equipment, first aid and miscellaneous supplies.

OIL SPILL CONTRACTORS

Targa maintains agreements with Certified Oil Spill Response Organizations (OSROs). These groups can be relied upon for an appropriate level of response with spill response equipment and trained personnel.

ADDITIONAL INFORMATION

For further information or pipeline maps of Targa’s pipeline systems, please contact Targa Resources.
