OPERATOR OVERVIEW

Great Lakes Gas Transmission, a TC Energy company, operates a 2,100-mile, high pressure natural gas pipeline system in Minnesota, Wisconsin, and Michigan. We transport natural gas to customers in the Midwestern and Northeastern United States and Eastern Canada. TC Energy operates one of the most sophisticated pipeline systems in the world. Our network of more than 56,000 miles of natural gas pipelines connect virtually every major natural gas supply basin and market, transporting 25% of the natural gas consumed in North America.
