WHO IS 3BEAR FIELD SERVICES LLC?

We operate about 60 miles of intrastate natural gas, liquid and natural gas liquid transportation pipelines with related storage, compression and metering facilities in New Mexico.

If you observe any unusual or suspicious activity near our pipeline facilities or in the unlikely event an emergency occurs, please call us at any time using one of the numbers listed in this document.

More information on 3Bear Field Services, LLC can be found at: www.3bearllc.com

WHAT SHOULD I DO IF I SUSPECT A PIPELINE LEAK?

Natural gas and Highly Volatile Liquids (HVL) are colorless and nearly invisible to the eye. Small leaks can be identified by looking for dying or discolored vegetation in a naturally green area.

Hazardous liquids produce a strong sheen or film standing on a body of water. A HVL leak may be identified by a fog-like vapor cloud in areas of high humidity. Natural gas is colorless, but blowing dirt around a pipeline area may be observed, or vapor and “ground frosting” may be visible at high pressures, regardless of temperature.

Other ways to recognize a leak may include: water bubbling up or standing in an unusual area, a mist or vapor cloud, a powerful fire or explosion with dense smoke plumes, or an area of petroleum-stained ground.

The volume of a pipeline leak can range from a quiet hissing to a loud roar, depending on the size and nature of the leak.

An unusual smell, petroleum or gaseous odor will sometimes accompany pipeline leaks. Natural gas and HVLs are colorless, tasteless and odorless unless odorants, such as Mercaptan, are added.

PIPELINE SAFETY

System failures occur infrequently along the nation’s network of interstate natural gas pipeline facilities, and many of these are caused by damage from others digging near the pipeline. We watch for unauthorized digging, but we request your help to notify us.

ALWAYS CALL 811 BEFORE YOU DIG!

**Know what's below.
Call before you dig.**

PIPELINE LOCATION AND MARKERS

Pipeline markers are used to indicate the approximate location of a natural gas pipeline and to provide contact information. Markers should never be removed or relocated by anyone other than a pipeline operator.

You can also find out where other companies’ pipelines are in your area by going to the National Pipeline Mapping System website at www.npms.phmsa.dot.gov.

EMERGENCY CONTACT:

**NGL and Crude Oil: 1-303-396-6068
Gas and Water: 1-575-552-3997**

Crude Oil	1267	128
Natural Gas	1971	115
Natural Gas Liquids	1075	115

NEW MEXICO COUNTIES OF OPERATION:

Lea

Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.

EMERGENCY RESPONSE PLANS

An Emergency Response Plan is developed for each pipeline facility to contain, control and mitigate the various types of emergency conditions/situations that could occur at one of our facilities. For more information regarding 3Bear Field Services, LLC emergency response plans and procedures, contact us at lklein@3bearllc.com.
