Durango Midstream / Frontier Field Services is wholly owned subsidiary of Durango Midstream. Frontier was founded in 2003 and is headquartered in The Woodlands, Texas.

The combined Frontier assets include over 266 MMSCFD of gas gathering, treating and processing facilities including 2,000 miles of pipeline and related facilities located in three states (New Mexico, Texas, and Kansas). These assets include:

- Maljamar: 145 MMSCFD cryogenic gas plant and related gathering system located and 3.5 MMSCFD Acid Gas Injection Capacity in Eddy, Lea, and Chavez Counties of Northern Delaware Basin in Southeast New Mexico.
- Empire ABO: 20 MMSCFD currently operating as a compressor station and gathering system located in Eddy County, New Mexico
- Dagger Draw Gas Plant: 95MMSCFD cryogenic gas plant and related gathering system located with Acid Gas Injection Capability in Eddy County in the Northern Delaware Basin in Southeast New Mexico.
- Kingsman: 26 MMSCFD cryogenic gas plant and gathering system located in Barber, Harper, Kingman, Pratt, Reno, Rice Stafford, Pawnee, and Edwards Counties, Kansas

WHAT ARE THE SIGNS OF NATURAL GAS PIPELINE LEAK?

- Blowing or hissing sound
- Dust blowing from a hole in the ground
- Continuous bubbling in wet or flooded areas
- Gaseous or hydrocarbon odor
- Dead or discolored vegetation in a green area
- Flames, if a leak has ignited

WHAT SHOULD I DO IF I SUSPECT A PIPELINE LEAK?

Your personal safety should be your first concern:

- Evacuate the area and prevent anyone from entering
- Abandon any equipment being used near the area
- Avoid any open flames
- Avoid introducing any sources of ignition to the area (such as cell phones, pagers, 2-way radios)
- Do not start/turn off motor vehicles/ electrical equipment
- Call 911 or contact local fire or law enforcement
- Notify the pipeline company
- Do not attempt to extinguish a natural gas fire
- Do not attempt to operate any pipeline valves

PIPELINE SAFETY

System failures occur infrequently along the nation’s network of interstate natural gas pipeline facilities, and many of these are caused by damage from other’s digging near the pipeline. We watch for unauthorized digging, but we request your help too.

To find out where Durango Midstream/ Frontier Field Services pipelines are located in your area, visit our website at www.durangomidstream.com or contact a Durango Midstream / Frontier Field Services representative at the number listed above.

You can also find out where other companies’ pipelines are in your area by going to the National Pipeline Mapping System website at www.npms.phmsa.dot.gov.
