

BLACK MOUNTAIN SAND

420 Commerce St. Ste. 500
 Fort Worth, TX 76102
 Phone: (817) 529-0015
 Website: www.blackmountainsand.com

WHO IS BLACK MOUNTAIN SAND

Black Mountain Sand, a Texas-based in-basin frac sand provider has recently expanded into Western Oklahoma's Mid-Continent. Construction is complete and the mine is in operation.

Located in Blaine County, the Mid-Continent facility will serve oilfield service companies and operators throughout central Oklahoma's SCOOP/STACK.

PIPELINE SAFETY

System failures occur infrequently along the nation's network of interstate natural gas pipeline facilities, and many of these are caused by damage from others digging near the pipeline. We watch for unauthorized digging, but we request your help to notify us.

ALWAYS CALL 811 BEFORE YOU DIG!

WHAT ARE THE SIGNS OF A NATURAL GAS PIPELINE LEAK?

- Blowing or hissing sound
- Dust blowing from a hole in the ground
- Continuous bubbling in wet or flooded areas
- Gaseous or hydrocarbon odor
- Dead or discolored vegetation in a green area
- Flames, if a leak has ignited

WHAT SHOULD I DO IF I SUSPECT A PIPELINE LEAK?

Your personal safety should be your first concern:

- Evacuate the area and prevent anyone from entering
- Abandon any equipment being used near the area
- Avoid any open flames
- Avoid introducing any sources of ignition to the area (such as cell phones, pagers, 2-way radios)
- Do not start/turn off motor vehicles/ electrical equipment
- Call 911 or contact local fire or law enforcement
- Notify the pipeline company

- Do not attempt to extinguish a natural gas fire
- Do not attempt to operate any pipeline valves

EMERGENCY RESPONSE PLANS

An Emergency Response Plan is developed to contain, control and mitigate the various types of emergency conditions/situations that could occur at one of our facilities. For more information regarding Black Mountain Sand's emergency response plans and procedures, contact us directly.

OKLAHOMA COUNTIES OF OPERATION:

Blaine

Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.

PIPELINE LOCATION AND MARKERS

Pipeline markers are used to indicate the approximate location of a pipeline and to provide contact information. Markers should never be removed or relocated by anyone other than a pipeline operator.

- Private Consumption Fuel Service Pipeline
- Approximate length – 5000 ft
- 6" HDPE PE 4710 SDR 11
- MAOP – 100 psig
