COMPANY PROFILE

The link between natural gas exploration and production and the enduse customer is known as the midstream segment of the natural gas industry. DCP Midstream leads the midstream segment as the nation's largest natural gas gatherer, the largest natural gas liquids (NGLs) producer and one of the largest NGL marketers.

DCP Midstream operates approximately 21,000 miles of pipeline in Oklahoma.

COMMITMENT TO SAFETY, HEALTH AND ENVIRONMENT

At DCP Midstream, we design, install, test, operate and maintain our pipelines to meet or exceed regulatory standards. We test our pipelines to withstand a higher pressure than encountered in daily use. Our employees receive regular, thorough training to safely operate and maintain our pipeline systems and respond to the unexpected incident. As part of our ongoing damage prevention program, we patrol our pipeline right-of-way corridors to spot potential safety problems, such as possible leaks or unauthorized construction. DCP Midstream performs preventive maintenance activities to ensure the safety and integrity of our lines is maintained.

DCP Midstream is committed to the safe operation of our pipelines. We conduct periodic preparedness training and outreach to local officials and emergency responders.

For more information regarding DCP Midstream's emergency response plans, maps and procedures, please contact us at the address listed above.

ONLINE TRAINING AVAILABLE

The American Petroleum Institute (API) and the Association of Oil Pipelines (AOPL) have developed a **FREE** online training portal designed to provide training on emergency response techniques for hazardous liquids or natural gas pipeline incidents. Please visit www.nasfm-training.org/pipeline to register.

PRODUCTS TRANSPORTED

Product: Natural Gas
Leak Type: Gas
Vapors:

Lighter than air and will generally rise and dissipate. May gather in a confined space and travel to a source of ignition.

Product Hazards:

Will be easily ignited by heat, sparks or flames and will form explosive mixtures with air. Vapors may cause dizziness or asphyxiation without warning and may be toxic if inhaled at high concentra-

Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.

tions. Contact with gas or liquefied gas may cause burns, severe injury and/or frostbite.

Product: Natural Gas Liquids

Leak Type: Gas

Vapors:

Initially heavier than air, spread along ground and may travel to source of ignition and flash back. Product is colorless, tasteless and odorless..

Product Hazards:

Will be easily ignited by heat, sparks or flames and will form explosive mixtures with air. Vapors may cause dizziness or asphyxiation without warning and may be toxic if inhaled at high concentrations. Contact with gas or liquefied gas may cause burns, severe injury and/or frostbite. Fire may produce irritating and/or toxic gases.
