

ABOUT KPC PIPELINE, LLC

KPC Pipeline, LLC (“KPC”) owns and operates a 1,120 mile interstate gas pipeline which transports natural gas from Oklahoma and Kansas to metropolitan Wichita, Kansas City and interconnecting pipeline markets. The KPC system includes three compressor stations with a total of 14,680 horsepower and has a capacity of approximately 160 MMcf/day. KPC has bidirectional interconnections with Enogex and Panhandle Eastern as well as supply interconnects with ANR Pipeline, Kansas Gas Services Transportation System. In addition, KPC can both receive gas from and deliver gas to Panhandle Eastern in its production and market zones. KPC is capable of distributing Anadarko and Arkoma basin gas into the Midwest and throughout Kansas, as well as accessing Oklahoma markets via Enogex. KPC is one of just a few pipelines that can facilitate north/south gas deliveries between various supply and market regions in the U.S.

WHAT DOES KPC DO IF A LEAK OCCURS?

To prepare for the event of a leak, KPC regularly communicates, plans, and trains with local emergency responders. Upon the notification of an incident or leak KPC will immediately dispatch trained personnel to assist emergency responders.

KPC employees and emergency responders are trained to protect life, property and facilities in the case of an emergency. KPC employees will also take steps to minimize the amount of product that leaks out and to isolate the emergency.

MAINTAINING SAFETY AND INTEGRITY OF PIPELINES

KPC invests significant time and capital maintaining the quality and integrity of their pipeline systems. Most active pipelines are monitored 24 hours a day via manned control centers. KPC also utilizes on-ground observers to identify potential dangers. Control center personnel continually monitor the pipeline system and assess changes in pressure and flow. They notify field personnel if there is a possibility of a leak. Automatic shut-off valves are sometimes utilized to isolate a leak.

Gas transmission and hazardous liquid pipeline operators have developed supplemental hazard and assessment programs known as Integrity
