COMPANY PROFILE

IMG Midstream develops, owns and operates distributed power generation plants in the Northeastern U.S. By using locally produced natural gas to generate electricity for the region, IMG is working with local producers to reinvest in the community and provide family-sustaining jobs for the region. All plant sites are wholly owned subsidiaries of IMG Midstream and are built using similar size, capacity and equipment to allow for economics of scale and operating efficiencies in building and maintenance costs. All IMG sites are located in close proximity to natural gas production as well as local substations to maximize utilization of existing infrastructure and minimize the need for additional infrastructure to be built.

PIPELINE DETAILS

- 3-6" natural gas lines
- Built to solely serve local generation plants

WHAT ARE THE SIGNS OF A NATURAL GAS PIPELINE LEAK?

- Blowing or hissing sound
- Dust blowing from a hole in the ground
- Continuous bubbling in wet or flooded areas
- Gaseous or hydrocarbon odor
- Dead or discolored vegetation in a green area
- Flames, if a leak has ignited

WHAT SHOULD I DO IF I SUSPECT A PIPELINE LEAK?

Your personal safety should be your first concern:

- Evacuate the area and prevent anyone from entering
- Abandon any equipment being used near the area
- Avoid any open flames
- Avoid introducing any sources of ignition to the area (such as cell phones, pagers, 2-way radios)

- Do not start/turn off motor vehicles/ electrical equipment
- Call 911 or contact local fire or law enforcement
- Notify the pipeline company
- Do not attempt to extinguish a natural gas fire
- Do not attempt to operate any pipeline valves

PIPELINE SAFETY

System failures occur infrequently along the nation's network of interstate natural gas pipeline facilities, and many of these are caused by damage from others digging near the pipeline. We watch for unauthorized digging, but we request your help too.

We participate in One-Call Centers and strongly encourage those who are going to dig to call their state One-Call Center or the 811 "Call before you dig" hotline (see below) to allow pipeline companies and owners of other buried utilities a chance to mark the underground facilities in the area before digging begins.

PIPELINE LOCATION AND MARKERS

Pipeline markers are used to indicate the approximate location of a natural gas pipeline and to provide contact information. Aerial patrol planes also use the markers to identify the pipeline route. Markers should never be removed or

relocated by anyone other than a pipeline operator.

You can also find out where other companies' pipelines are in your area by going to the National Pipeline Mapping System website at www.npms.phmsa.dot.gov.

EMERGENCY RESPONSE PLANS

An Emergency Response Plan is developed for each pipeline facility to contain, control and mitigate the various types of emergency conditions/situations that could occur at one of our facilities. Emergency Response Plans are located at each of IMG Midstream's plants. For more information regarding IMG Midstream's Emergency Response Plans and procedures, contact us at 1-877-260-1339.
