Repsol is a multi-energy company present throughout the value chain. From exploration, production, and refining to new energy research, development, and marketing, we bring efficient, sustainable, and competitive energy to millions of people.

We are present in 31 countries, distributing and selling our products across 90 countries with a diverse and multidisciplinary team comprising more than 25,000 people of 84 nationalities worldwide.

In the United States, Repsol has exploration and production assets in the Gulf of Mexico, the Marcellus Shale in Pennsylvania, the Eagle Ford Shale in South Texas, the North Slope in Alaska and the Trenton-Black River in New York. With hard work, talent, and enthusiasm, Repsol is working to build a better future through the development of smart energy solutions.

REPSOL’S CULTURE OF SAFETY

Repsol promotes a positive culture of safety, seeking to achieve optimal performance in all operations, protecting the people, facilities and environment around it. We believe in providing high quality and effective safety awareness communication and training for emergency responders in the communities where we work.

OUR PIPELINES

In our New York and Pennsylvania operations, we produce methane, a clean, odorless, colorless natural gas. We find it in geologic formations ranging from 6,000 to 12,000 feet deep.

Methane is highly flammable. Our main method of safely transporting it is through pipelines.

Our natural gas pipelines are made of durable materials that meet or exceed the specifications set by state and federal regulations. Ranging from 2- to 20- inches in diameter, coated or wrapped to prevent damage, they carry natural gas to large, interstate transmission pipelines. Most of our lines are buried, although we do operate some above-ground facilities and valves. Our pipeline are monitored by Repsol employees to ensure their integrity, and include emergency shutdown valves throughout our

Changes may occur. Contact Repsol to discuss their pipeline systems and areas of operation.

pipeline network. We also maintain a damage prevention program in accordance with state and federal guidelines.

WANT TO HELP?

Pipeline accidents are rare, but the leading cause of pipeline damage is third-party excavation. It helps if those living and working near pipelines protect against unauthorized excavations or other destructive activities by reporting concerns on unusual or unsafe activity to the pipeline operator or police.

DID YOU KNOW?

Heavy equipment, such as logging trucks, and recreational vehicles, such as ATVs, can damage pipeline right-of-ways by leaving deep ruts. This may compromise the pipeline. **Avoid driving on pipeline right-of-ways, and don’t use them for recreation.**

EMERGENCY RESPONSE

If you are called to respond to an incident at one of our pipelines, please follow these important guidelines:

DO:

- Report the emergency, including type (leak, fire, rupture) and location to Repsol at 1-800-530-5392
- Secure the site, control access and evacuate people, if necessary
- Wait for instructions from a Repsol employee
- Allow Repsol employees access to the site, and work with them to control the situation
- Stay upwind and be aware of potential gas migration and secondary fires
- Preserve the scene for future incident investigation

DON'T:

- Introduce an ignition source, such as automobile engines, cell phones, portable compressors
- Enter the site until a Repsol representative arrives and describes operating procedures
- Fight pipeline fires, except under the direct supervision of Talisman personnel
- Operate pipeline valves
- Enter areas that may contain deadly hydrogen sulfide (H₂s). If a foul odor, similar to rotten eggs, is noticeable, H₂s may be present. However, since H₂s quickly causes you to lose your sense of smell, H₂s detection equipment is necessary. If in doubt, do not proceed without proper protection.
- Attempt to rescue someone who is down without appropriate respiratory protection and any other necessary personal protective equipment.

As local public safety officials and emergency responders, you play an important role in helping Repsol safeguard the public, our pipelines and facilities. Repsol appreciates the work you do in helping to keep our community safe!
