

Operated by Crestwood

**OVERVIEW**

Stagecoach Gas Services, LLC, is a natural gas pipeline and storage business located in the southern tier of New York and the northern tier of Pennsylvania, and is jointly owned by Con Edison and Crestwood. Operational safety and environmental protection are top priorities at Stagecoach and we are dedicated to educating communities on pipelines and how to avoid pipeline accidents.

Stagecoach Gas Services, LLC owns and operates natural gas storage facilities in New York and Pennsylvania, where natural gas is stored underground. Pipelines connected to these underground storage wells then transport the natural gas to or from other interconnecting pipeline companies for delivery to end users.

**PIPELINE FACILITY LOCATION**

The **Stagecoach Pipeline & Storage system** stretches 95 miles, north-to-south, between Owego, NY and Muncy Valley, PA and traverses Tioga County, NY, and Bradford, Sullivan, and Lycoming Counties, PA. The pipeline serves SP&SP’s natural gas storage field in southern NY and northern PA and transports gas between the storage caverns and interconnects with other pipeline companies.

The **Seneca Pipeline East system** stretches 40 miles, in a northwest-to-southeast direction, from near Ithaca, NY, to Binghamton, NY and traverses Tompkins, Tioga, and Broome Counties, NY.

The **Arlington Storage Company (ASC) system** includes three natural gas storage locations. Steuben Gas Storage located in Canisteo, NY has pipelines in Steuben County. Thomas Corners Gas Storage is located in Bath, NY and has pipelines in Steuben County. Seneca Lake Gas Storage is located in Watkins Glen, NY and has pipelines both in Chemung and Schuylar Counties.

**PRODUCTS TRANSPORTED IN YOUR AREA: NATURAL GAS**

Natural Gas is lighter than air and will generally rise and dissipate. Though, gas may gather in a confined space and travel to a source of ignition. Natural gas will be easily ignited by heat, sparks, or flames and will form explosive mixtures with air.

**HOW TO RECOGNIZE A PIPELINE LEAK: SIGHT – SOUND - SMELL**

- Look: A spot of dead or discolored vegetation amid healthy plants, bubbles coming from pools of water, dirt being blown into the air, or fire at or below ground level are signs of a possible leak around the pipeline area.
- Listen: Listen for any unusual noise like a hissing or roaring sound
- Smell: Although natural gas is odorless, an unusual smell or odor may sometimes accompany a pipeline leak.

**WHAT TO DO IF A GAS LEAK OCCURS**

- Do NOT do anything that would create a spark (an ignition): do not light any matches, switch on equipment or lights, use a cell phone, or drive into a leak or vapor cloud area
- Immediately evacuate the area – in an upwind direction. Warn others to stay away.
- **DO call -911 from a safe location, then call Stagecoach Gas Services at 866-234-7473**

**STAGECOACH GAS SERVICES EMERGENCY CONTACT PHONE: 866-234-7473**

**EMERGENCY RESPONSE**

In the unlikely event of a fire or gas leak from one of our pipelines or facilities, we are prepared to respond in a timely manner. In order to facilitate such a response, we maintain an Emergency Response

**EMERGENCY CONTACT:  
1-866-234-7473**

<b>PRODUCTS/DOT GUIDEBOOK ID#/GUIDE#:</b>		
Natural Gas	1971	115

**PENNSYLVANIA COUNTIES OF OPERATION:**

Bradford	Sullivan
Lycoming	

**NEW YORK COUNTIES OF OPERATION:**

Broome	Steuben
Chemung	Tioga
Schuylar	Tompkins

*Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.*

Plan and participate in area-wide emergency response drills with other, local, energy companies. Our Emergency Response Plan is available upon request.

In order to implement such a response, **if you notice any signs of an emergency, call -911 or our emergency response number: 866-234-7473**

**PREVENTING PIPELINE DAMAGE AND LEAKS**

One of the largest causes of pipeline accidents is third-party damage caused by someone digging in the vicinity of the pipeline without knowing exactly where the pipeline is located. Laws in all states require that individuals who plan to dig call -811 at least two (2) business days in advance of any excavation activity. A single call to -811 from anywhere in the country is at no charge and connects the caller to the nearest state One-Call Center. The One-Call Center collects information about the proposed digging project and transmits the information to all underground utilities that may be impacted so that the exact location of the lines can be marked before excavation begins.

Any type of excavation – whether mechanized or by hand – requires a call to -811. Failure to call -811 before digging can result in injuries or deaths, damage to the pipeline, disruption in service, a delay of your project, and possibly a fine or penalty.

If you strike a pipeline during excavation, it is extremely important that you report **it by calling our emergency phone number 866-234-7473**. Even a scrape or dent in the pipeline needs to be reported promptly so that we can investigate and repair it. Failure to report a small dent may result in a future leak or serious accident.
