**COMPANY OVERVIEW**

Tennessee Gas Pipeline is one of the interstate pipelines that make up Kinder Morgan, Inc. Tennessee Gas Pipeline is comprised of approximately 11,750 miles and 1.4mm certificated horsepower. The pipeline stretches from the Mexican border to Canada. Tapping supply regions in the Gulf of Mexico, Texas, Appalachia, and Canada, the Tennessee system serves markets across the Midwest and mid-Atlantic regions, including major metropolitan centers such as Chicago, New York, and Boston.

Tennessee's assets are placed ideally to take advantage of new natural gas supplies from Canada, including Nova Scotia, and emerging liquefied natural gas (LNG) projects along the Gulf Coast and Eastern Seaboard. Additionally, the company is poised for continued growth as new natural gas-fired power generation facilities are built to meet the increasing electricity demand along its pipeline route. Well connected, Tennessee has more than 100 interconnects with most major interstate and intrastate pipeline systems serving the Midwest, Northeast, mid-Atlantic, and southeastern United States.

Offering long-term growth options and continued rate stability, Tennessee is prepared to meet the demands of a growing market with the integrity and commitment to service that have made it one of the safest and most reliable pipelines in the United States.

**BASIC INFORMATION FOR LANDOWNERS ALONG THE TENNESSEE GAS PIPELINE COMPANY'S RIGHTS OF WAY**

The Tennessee Gas Pipeline Company's pipelines are always constructed along rights of way, which are long, narrow stretches of land designating a safe and clear corridor for the pipeline. A Right of Way Agreement or Pipeline Easement is a legal document through which the property owner grants the pipeline company permission to use a portion

of his or her land to install, operate, and maintain its pipeline facilities. It also provides the company with access rights to and over the rights of way, so employees may inspect and maintain the pipeline after it is built. The Tennessee Gas Pipeline Company regularly maintains the rights of way along its pipeline systems to ensure the pipeline remains safe and to protect the area's ecological balance.

To ensure pipeline integrity:

- Do not erect buildings or any other structures on the pipeline right of way.
- Do not plant trees or place any other obstructions on the right of way.
- Do not excavate, change the grade, or impound water within the right of way without approval.
- Do not move heavy equipment across the right of way without approval.

Although building on the right of way is prohibited, under certain conditions, the pipeline may be crossed by roads, railroads, streets, cables, and utility lines. In these instances, the Tennessee Gas Pipeline Company will work with the owner and developer to accommodate construction. The owner or developer will be required to pay any costs necessary to ensure that the pipeline continues to meet all regulations under the new conditions. If you are a landowner and would like more information, please contact the Tennessee Gas Pipeline Company office nearest you.

**TENNESSEE GAS PIPELINE COMPANY'S CRISIS RESPONSE PROGRAM: WORKING WITH YOU**

The Tennessee Gas Pipeline Company is committed to running a safe, reliable pipeline system. As part of that commitment, we work closely with

GAS  
PIPELINE**

CAUTION DO NOT DIG

INTENTIONAL DAMAGE TO ANY FACILITY USED IN INTERSTATE PIPELINE TRANSPORTATION OF NATURAL GAS IS PUNISHABLE BY A FINE UP TO \$25,000 AND 15 YEARS IN PRISON. INTENTIONAL DAMAGE TO A PIPELINE MARKER, SIGN, OR MARINE BUOY IS PUNISHABLE BY A FINE OF UP TO \$5,000 AND 1 YEAR IN PRISON.

- **Isolate the area** and restrict entry to trained emergency response personnel and designated Tennessee Gas Pipeline Company employees.
- **Establish isolation zones** based upon measurements from combustible gas indicator instruments. Gas odor or lack of gas odor is not sufficient to establish safe zones.
- **Avoid creating sparks.** Potential ignition sources for natural gas include electrical motors, firearms, static electricity, nonexplosion-proof flashlights or tools, and any open flame or spark. Do not light a match, start an engine, use a telephone, switch lights on or off, or do anything that may create a spark.
- **Immediately make the operator aware of the situation.** Check the posted right of way or station signs to find out what company operates the pipeline and how to contact the operator.

- **Let the escaping gas burn if it is on fire.** Attempting to extinguish a natural gas fire may result in a secondary explosion. If necessary, provide cooling for nearby exposures that are threatened by the fire.
- **Let the Tennessee Gas Pipeline Company personnel operate the valves** to cut off the fuel supply. Do not operate the valves yourself.
- **Avoid forced ventilation of structures and excavations.** Forced ventilation can actually increase the possibility of a flammable atmosphere.

The Tennessee Gas Pipeline Company's field locations hold meetings with emergency responders on a regular basis to educate them on our operations. If you are interested in finding out more about this program or in attending a meeting, contact the Tennessee Gas Pipeline Company office nearest you.
