WHO IS ECO-ENERGY STONE MOUNTAIN, LLC?

Eco-Energy Natural Gas, LLC operates 590 miles of interstate natural gas pipeline throughout Kentucky, Virginia, and Tennessee, along with related compression stations, a cryogenic plant facility, and a natural gas liquids rail terminal. More information about Eco-Energy Natural Gas, LLC can be found at www.eco-energy.com.

COMMITMENT TO PUBLIC SAFETY AND AWARENESS

Eco-Energy Stone Mountain, LLC is committed to the safe operation of our natural gas infrastructure. This includes open, consistent communication with the public, excavators, emergency officials, public officials and other interested

parties. Our outreach efforts are outlined in our Public Awareness Program, which provides details on how we build relationships with those who live or work near our pipeline. Eco-Energy Natural Gas, LLC is a member of “one-call” systems in each state it operates. These are designed to help contractors and others identify the location of pipelines prior to excavation.

IN THE EVENT OF AN EMERGENCY

Eco-Energy Natural Gas, LLC has emergency preparedness and planning measures in place should a pipeline incident occur. This includes proactive communication with local emergency response organizations, formal emergency response plans, and internal training of personnel.
