EMERGENCY RESPONSE CAPABILITIES

COMMITMENT

Alon USA, LP (Alon) is committed to the protection of the public and the environment through the safe operation and maintenance of its pipeline systems. Alon’s qualified personnel are trained in emergency response activities and regularly participate in drills and exercises reflecting various types of response levels, emergency scenarios, topographic terrain and environmental sensitivities.

Alon has committed the necessary resources to fully prepare and implement its emergency response plans and has obtained through contract the necessary private personnel and equipment to respond, to the maximum extent practicable, to a “worst case” discharge or substantial threat of such a discharge.

COMMUNICATIONS

Alon utilizes its 24-hour Pipeline Control Center (1-800-343-7298) as a hub of communications in emergency response situations. The Control Center has a vast catalog of resources and capabilities. On-site communications are conducted using cellular telephones, 6GigHz analog 120 channel microwave radios (in Company vehicles), portable Motorola Radios and/or landline telephone systems from Company facilities and offices.

INCIDENT COMMAND SYSTEM

Alon utilizes an expandable Incident Command System. Depending upon the size and complexity of an incident, additional Company or contract personnel may be added as needed. Additional federal, state or local agencies may be integrated into the Incident Command System by utilizing a Unified Command Structure.

OIL SPILL CONTRACTORS

Certified Oil Spill Response Organizations (OSROs) under contract by Alon are Garner Environmental Services, Inc. and Eagle Construction & Environmental Services. These OSROs can be relied upon for an appropriate level of response with spill response equipment and trained personnel.

CONTACTS

For more information regarding Alon USA, LP emergency response plans and procedures, call Johnny Jackson at (432) 230-3272.
