

**ABOUT AMERESCO**

Ameresco, Inc. headquartered in Framingham, MA, is an energy services provider of Green, Clean & Sustainable Energy.

Ameresco owns and operates pipelines throughout the United States. These pipelines are part of Ameresco's Practical Renewable Energy Solutions that takes methane from landfills and biogas from waste water treatment facilities and sends the gas to an end user.

Ameresco has pipelines in Arizona, California, Georgia, Indiana, Michigan, Missouri, South Carolina and Texas.

**WHAT DOES AMERESCO DO IF A LEAK OCCURS?**

In the event of a leak, Ameresco's qualified pipeline operators communicate with local emergency personnel and first responders. Upon the notification of an incident or leak, Ameresco will dispatch trained personnel to evaluate the situation, shutdown and isolate the pipeline if necessary and assist emergency personnel and first responders.

Ameresco pipeline operators, emergency personnel and first responders are trained to protect life, property & facilities in the event of an emergency.

Ameresco pipeline operators will also take steps to minimize the amount of product (gas/methane) that leaks out to the atmosphere and to isolate the pipeline if necessary.

**MAINTAINING SAFETY AND INTEGRITY OF PIPELINES**

Ameresco has invested significant time and capital maintaining the safety, quality and integrity of their pipeline systems. All operators have had computer based training and field training to ensure that all safety and precautions are kept to the highest industry standards.

All Ameresco pipelines are continuously monitored for changes in pressure and flow.

These pipelines are protected by multiple automatic shut-off valves, pressure relief valves and manually operated valves used in the event of emergency or excessive pressure.

Ameresco and their operators have developed supplemental hazard and assessment programs known as Integrity Management Programs (IMPs). Specific information about Ameresco may be found on our Web site or by contacting us directly.

**EMERGENCY CONTACT:

**PRODUCTS TRANSPORTED IN YOUR AREA**

PRODUCT	LEAK TYPE	VAPORS
<b>LANDFILL GAS/ METHANE BIO-GAS/ METHANE</b>	Gas	Lighter than air and will generally rise and dissipate. May gather in a confined space and travel to a source of ignition.
<b>HEALTH HAZARDS</b>	Will be easily ignited by heat, sparks or flames and will form explosive mixtures with air. Vapors may cause dizziness or asphyxiation without warning and may be toxic if inhaled at high concentrations.	
PRODUCT	HEALTH HAZARDS	
<b>HYDROGEN SULFIDE (H2S)</b>	Gas	Vapors from liquefied gas are initially heavier than air and spread along ground. Vapors may travel to source of ignition and flash back.
<b>HEALTH HAZARDS</b>	May be ignited by heat, sparks or flames. TOXIC; Extremely Hazardous. May be fatal if inhaled or absorbed through skin. Initial odor may be irritating or foul and may deaden your sense of smell. Contact with gas or liquefied gas may cause burns, severe injury and/or frostbite. Fire will produce irritating, corrosive and/or toxic gases.
