ABOUT BB-SOUTHTEX, LLC

Crude Oil gathering system located in Bexar, Karnes and Wilson Counties.

PIPELINE SAFETY

According to National Transportation Safety Board statistics pipelines are the safest and most efficient means of transporting petroleum products, which are used to supply the energy we use. These pipelines transport hundreds of billions of ton/miles of liquid petroleum products in the United States each year.

If you observe any unusual or suspicious activity near our pipeline facilities or in the unlikely event an emergency occurs, please call us at any time using one of the numbers listed in this document.

We participate in One-Call Centers and strongly encourage those who are going to dig to call their state One-Call Center or the 811 “Call before you dig” hotline (see below) to allow pipeline companies and owners of other buried utilities a chance to mark the underground facilities in the area before digging begins.

You can also find out where other companies’ pipelines are in your area by going to the National Pipeline Mapping System website at www.npms.phmsa.dot.gov.

WHAT ARE THE SIGNS OF A CRUDE OIL PIPELINE LEAK?

- **Sight:** Oily or rainbow sheen on water surface, water bubbling or being blown into the air, a pool of liquid on the ground, dead or discolored vegetation amongst healthy plants, and flames near a pipeline.
- **Sound:** Hissing or gurgling sound near a pipeline.
- **Smell:** A petroleum odor.

WHAT SHOULD I DO IF I SUSPECT A PIPELINE LEAK?

- Turn off all equipment and eliminate any ignition sources without risking injury.
- Leave the area by foot immediately. Try to direct any other bystanders to leave the area. Attempt to stay upwind.
- From a safe location, notify BB-SouthTex immediately and call 911 or your local emergency response number. BB-SouthTex and the 911 operator will need your name, your phone number, a brief description of the incident, and the location so the proper response can be initiated.

PIPELINE LOCATION AND MARKERS

Pipeline markers are used to indicate the approximate location of a natural gas pipeline and to provide contact information.

EMERGENCY CONTACT:

1-210-569-6756

PRODUCTS/DOT GUIDEBOOK ID#/GUIDE#:

Crude Oil 1267 128

TEXAS COUNTIES OF OPERATION:

Bexar Wilson
Karnes

Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.

Markers should never be removed or relocated by anyone other than a pipeline operator.

EMERGENCY RESPONSE PLANS

An Emergency Response Plan is developed for each pipeline facility to contain, control and mitigate the various types of emergency conditions/situations that could occur at one of our facilities. For more information regarding BB-SouthTex’s emergency response plans and procedures, contact us directly.
