

BESCO OPERATING, L.P.

ABOUT BESCO OPERATING, L.P

BESCO Operating, L.P is a privately held exploration and production company engaged in the development of oil and gas in Texas.

WHAT DOES BESCO OPERATING, L.P DO IF A LEAK OCCURS?

To prepare for the event of a leak, pipeline companies regularly communicate, plan and train with local emergency responders. Upon the notification of an incident or leak the pipeline company will immediately dispatch trained personnel to assist emergency responders.

Pipeline operators and emergency responders are trained to protect life, property and facilities in the case of an emergency.

Pipeline operators will also take steps to minimize the amount of product that leaks out and to isolate the pipeline emergency.

MAINTAINING SAFETY AND INTEGRITY OF PIPELINES

We believe it is our responsibility to be good neighbors and maintain a strong commitment to damage prevention and safety through the implementation of industry developed best management practices and monitoring of our operations. Our commitment extends to employees, contractors, local communities, and others who may be impacted by our operations. We conduct our operations in a responsible manner to protect human health and safety while minimizing environmental impacts.

HOW TO GET ADDITIONAL INFORMATION

PRODUCTS/DOT GUIDEBOOK ID#/GUIDE#:

Natural Gas	1971	115
Condensate	3295	128
Produced Water		

TEXAS

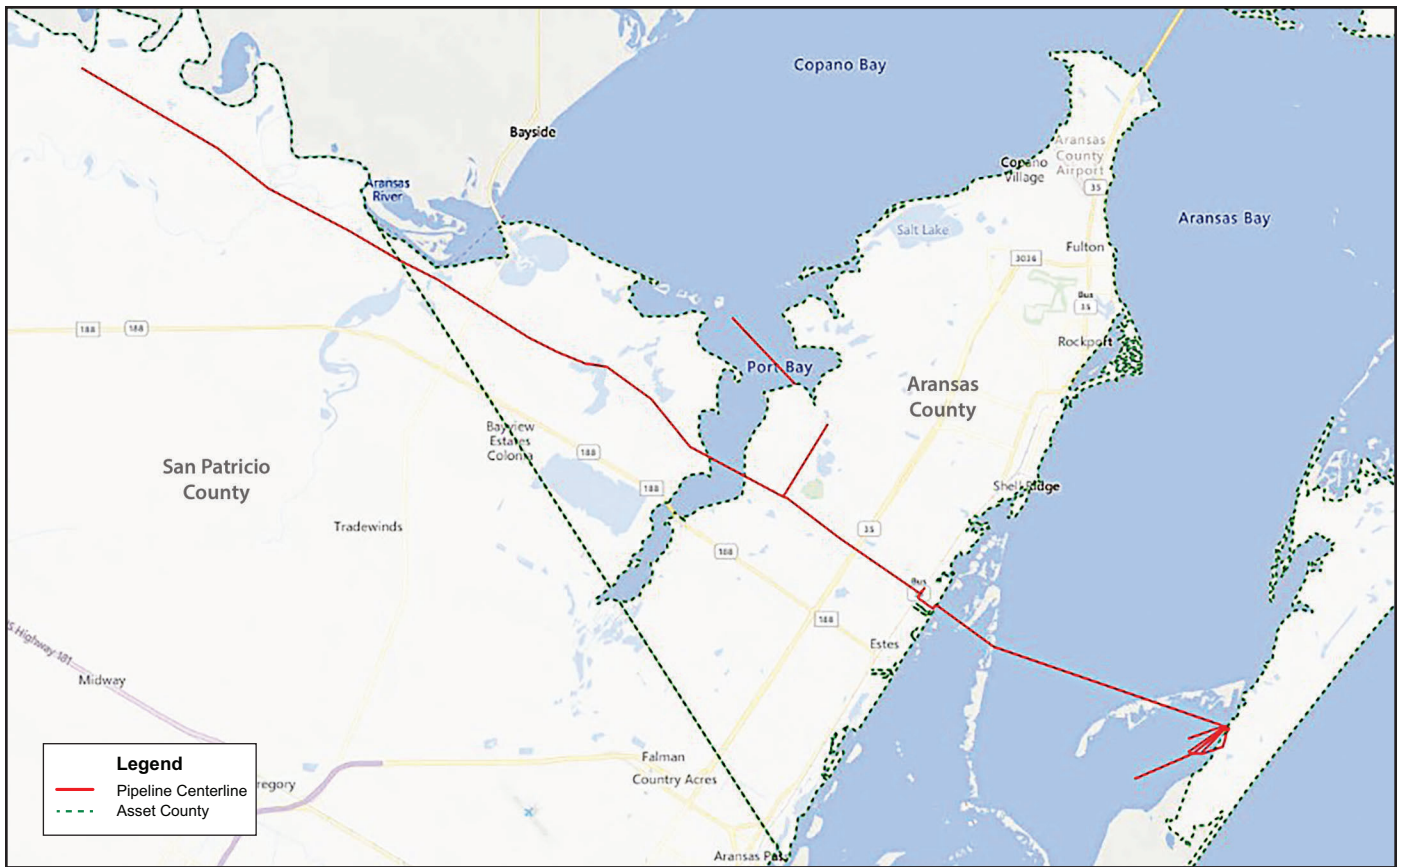

COUNTIES OF OPERATION:

Aransas San Patricio

Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.

PRODUCTS TRANSPORTED IN YOUR AREA*

PRODUCT	LEAK TYPE	VAPORS
NATURAL GAS	Gas	Lighter than air and will generally rise and dissipate. May accumulate in a confined space.
HEALTH HAZARDS	May be ignited by heat, sparks or flames and may form explosive mixtures with air or travel to source of ignition and flashback. Vapors may cause dizziness or asphyxiation without warning and may be toxic if inhaled at high concentrations. Contact may cause skin irritation, burns, frostbite and/or sever injury.	
PRODUCT	LEAK TYPE	VAPORS
CONDENSATE	Liquid	Lighter than water.
		VAPORS Most are heavier than air. May spread along ground and collect in low or confined spaces.
HEALTH HAZARDS	May be ignited by heat, sparks, flames or other sources of ignition (e.g., static electricity) and may form explosive mixtures with air or travel to source of ignition and flashback. Vapors may cause dizziness, drowsiness or lethargy without warning. Vapors may be toxic if inhaled at high concentrations and liquids are harmful if swallowed. Contact may cause skin irritation.	
PRODUCT	LEAK TYPE	VAPORS
PRODUCED WATER	Liquid	Produced water is heavier than freshwater and equal to or heavier than saltwater.
		VAPORS Produced water is heavier than freshwater and equal to or heavier than saltwater.
HEALTH HAZARDS	Product is not flammable; however, natural gas condensate floating on surface of produced water may be easily ignited by heat, sparks, flames or other sources of ignition (e.g., static electricity) and may form explosive mixtures with air or travel to source of ignition and flashback. Vapors may cause dizziness, drowsiness or lethargy without warning. Vapors may be toxic if inhaled at high concentrations and liquids are harmful if swallowed. Contact may cause skin irritation.
