

**ABOUT CONOCOPHILLIPS**

ConocoPhillips is a large and geographically diverse pure-play exploration and production company with a large diversified portfolio. ConocoPhillips is the seventh-largest holder of proved reserves worldwide. Headquartered in Houston, Texas, ConocoPhillips operates in more than 30 countries and in various states in the Lower 48 and Alaska.

**WHAT DOES CONOCOPHILLIPS DO IF A LEAK OCCURS?**

To prepare for the event of a leak, ConocoPhillips regularly communicates, plans and trains with local emergency responders. Upon the notification of an incident or leak ConocoPhillips will immediately dispatch trained personnel to assist emergency responders.

ConocoPhillips and emergency responders are trained to protect life, property and facilities in the case of an emergency.

ConocoPhillips will also take steps to minimize the amount of product that leaks out and to isolate the pipeline emergency.

**MAINTAINING SAFETY AND INTEGRITY OF PIPELINES**

Some of the ways ConocoPhillips make our pipelines and terminals safe include:

- Control center available 24-hours-a-day
- Inspections of pipeline rights-of-way
- Internal inspections of pipelines

- Hydro testing – testing line integrity using water under pressure
- Cathodic protection to mitigate corrosion
- Emergency response training with local fire and police departments
- Excavator education and support of state one-call centers

**HOW TO GET ADDITIONAL INFORMATION**

For additional information contact us at 888-766-3000.

**PRODUCTS TRANSPORTED**

PRODUCT	LEAK TYPE	VAPORS
<b>HIGHLY VOLATILE LIQUIDS [SUCH AS: BUTANE, PROPANE, ETHANE, PROPYLENE, AND NATURAL GAS LIQUIDS (NGL)]</b>	Gas	Initially heavier than air, spread along ground and may travel to source of ignition and flash back. Product is colorless, tasteless and odorless.
<b>HEALTH HAZARDS</b>	Will be easily ignited by heat, sparks or flames and will form explosive mixtures with air. Vapors may cause dizziness or asphyxiation without warning and may be toxic if inhaled at high concentrations. Contact with gas or liquefied gas may cause burns, severe injury and/or frostbite. Fire may produce irritating and/or toxic gases..	
<b>NATURAL GAS</b>	Gas	Lighter than air and will generally rise and dissipate. May gather in a confined space and travel to a source of ignition.
<b>HEALTH HAZARDS</b>	Will be easily ignited by heat, sparks or flames and will form explosive mixtures with air. Vapors may cause dizziness or asphyxiation without warning and may be toxic if inhaled at high concentrations. Contact with gas or liquefied gas may cause burns, severe injury and/or frostbite.
