

Crestwood Midstream Partners LP operates gathering and transmission pipelines, along with gas processing, and storage facilities in many regions of the US. These pipelines are vital to the country's energy infrastructure and are a safe and efficient way to transport natural gas. Crestwood is committed to safety and dedicated to educating communities on pipeline safety and how to avoid pipeline accidents.

**COMPANY LOCATIONS:**

**Cowtown Pipeline Partners L.P.** operates a natural gas and NGL gathering system with processing and compression facilities in the Barnett Shale in Denton, Hood, Johnson, Somervell, and Tarrant Counties.  
Office: 4468 FM 2331  
Godley, TX 76044

**Tres Palacios Gas Storage, LLC** operates a 24-inch pipeline system that connects to multiple pipeline companies and stores natural gas in underground salt dome caverns in Colorado, Matagorda, and Wharton Counties  
Office: 6700 FM 1468 North  
Markham, TX 77456

**IDENTIFYING PIPELINES:**

Pipeline markers are used to show the location of underground pipelines. Markers are located at road crossings, railroad crossings, and along the pipeline rights-of-way. They will include the following:

- The material transported in the pipeline.
- The name of the pipeline operator.
- The telephone number where the operator can be reached in an emergency.

**Know what's below.  
Call before you dig.**

**CALL BEFORE YOU DIG:**

One of the largest causes of pipeline accidents is third-party damage caused by someone digging in the vicinity of the pipeline without knowing exactly where the pipeline is located. Laws in Texas require that individuals who plan to dig call 811 at least two (2) business days in advance of any excavation activity. A single call to 811 from anywhere in Texas is at no charge and connects the caller to the state One-Call Center. The One-Call Center collects information about the proposed digging project and transmits the information to all underground utilities that may be impacted so that the exact location of all the lines can be marked before excavation begins.

**HOW TO RECOGNIZE A PIPELINE LEAK: SIGHT - SOUND - SMELL**

- **Look:** A spot of dead or discolored vegetation amid healthy plants, bubbles coming from pools of water, dirt being blown into the air, or fire at or below ground level are signs of a possible leak around the pipeline area.
- **Listen:** Listen for any unusual noise like a hissing or roaring sound
- **Smell:** Although natural gas is odorless, and Crestwood does not transport odorized gas, an unusual smell or odor may sometimes accompany a pipeline leak.®

**EMERGENCY RESPONSE:**

**Excavators**

- Do not drive into the area where the leak or vapor cloud is located
- Do not make contact with escaping liquids or vapors

**EMERGENCY CONTACT:**

**1-866-234-7473**

**PRODUCTS/ DOT GUIDEBOOK ID#/ GUIDE#:**

Natural Gas	1971	115
NGL	1972	115

**TEXAS**

**COUNTIES OF OPERATION:**

Loving	Ward
Reeves	Winkler

*Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.*

- Avoid possible ignition sources (e.g., turn off and abandon all equipment, vehicles, and or generators being used in the affected area)
- Do not light a match, start an engine or automobile, use a telephone, switch on/off an electric light, or ring doorbells
- Immediately leave the area, on foot in an upwind direction if possible
- From a safe distance call 911 and the **Crestwood emergency number 866-234-7473**
- Wait, if in a safe area, for Crestwood personnel to arrive on site and do not try to operate any pipeline valves yourself
- Warn others to stay away from the area

**PUBLIC OFFICIALS & EMERGENCY RESPONDERS**

- Evacuate people (homes, businesses, schools...etc.) to an upwind area
- Secure area around the leak
- If the pipeline leak is not burning, take steps to prevent ignition such as prohibiting smoking, and rerouting traffic away from the leak.

- If the pipeline is burning, take steps to prevent secondary fires, but do not attempt to extinguish a pipeline fire unless asked to do so by Crestwood
- Do not try to operate any pipeline valves yourself (unless directed by Crestwood)
- Call the **Crestwood emergency number 866-234-7473** as soon as possible
- Administer medical treatment and request additional emergency response assistance as necessary
