

ABOUT ESCONDIDO RESOURCES

Escondido Resources is a private independent exploration, production, and development company focused on developing unconventional reserves in South Texas. Escondido’s management team has combined over 150 years of experience in the industry with significant work in South Texas, and the company’s strategy is to grow through low-risk exploitation of its existing properties and acreage. Currently, Escondido is developing its 40,000 gross-acreage position in Webb and La Salle counties in the prolific Eagle Ford Shale, along with the Escondido, Austin Chalk, and Olmos formations utilizing horizontal drilling technologies. These new technologies dramatically enhance the company’s ability to economically increase production and reserves while minimizing the environmental footprint of its operations.

WHAT ARE THE SIGNS OF A NATURAL GAS PIPELINE LEAK?

- Blowing or hissing sound
- Dust blowing from a hole in the ground
- Continuous bubbling in wet or flooded areas
- Gaseous or hydrocarbon odor
- Dead or discolored vegetation in a green area
- Flames, if a leak has ignited

WHAT SHOULD I DO IF I SUSPECT A PIPELINE LEAK?

Your personal safety should be your first concern:

- Evacuate the area and prevent anyone from entering
- Abandon any equipment being used near the area
- Avoid any open flames
- Avoid introducing any sources of ignition to the area (such as cell phones, pagers, 2-way radios)
- Do not start/turn off motor vehicles/ electrical equipment
- Call 911 or contact local fire or law enforcement
- Notify the pipeline company

- Do not attempt to extinguish a natural gas fire
- Do not attempt to operate any pipeline valves

PIPELINE SAFETY

System failures occur infrequently along the nation’s network of interstate natural gas pipeline facilities, and many of these are caused by damage from others digging near the pipeline. We watch for unauthorized digging, but we request your help to notify us.

ALWAYS CALL 811 BEFORE YOU DIG!

PIPELINE LOCATION AND MARKERS

Pipeline markers are used to indicate the approximate location of a natural gas pipeline and to provide contact information. Aerial patrol planes also use the markers to identify the pipeline route. Markers should never be removed or relocated by anyone other than a pipeline operator.

**EMERGENCY CONTACT:
972-943-4438**
