ABOUT GAITHER PETROLEUM CORPORATION

Gaither Petroleum Corporation (GPC) is a privately held oil/gas company engaged in the gathering of natural gas in Texas.

WHAT DOES GAITHER PETROLEUM CORPORATION DO IF A LEAK OCCURS?

To prepare for the event of a leak, pipeline companies regularly communicate, plan and train with local emergency responders. Upon the notification of an incident or leak the GPC will immediately dispatch trained personnel to assist emergency responders.

Pipeline operators and emergency responders are trained to protect life, property and facilities in the case of an emergency.

Pipeline operators will also take steps to minimize the amount of product that leaks out and to isolate the pipeline emergency.

MAINTAINING SAFETY AND INTEGRITY OF PIPELINES

We believe it is our responsibility to be good neighbors and maintain a strong commitment to damage prevention and safety through the implementation of industry developed best management practices and monitoring of our operations. Our commitment extends to employees, contractors, local communities, and others who may be impacted by our operations. We conduct our operations in a responsible manner to protect human health and safety while minimizing environmental impacts.

HOW TO GET ADDITIONAL INFORMATION

For additional information about GPC's emergency response plans and procedures, please contact:

Glen Bertrand
 Operations Manager

RESPONDING TO A LEAK

EVACUATE THE AREA IMMEDIATELY

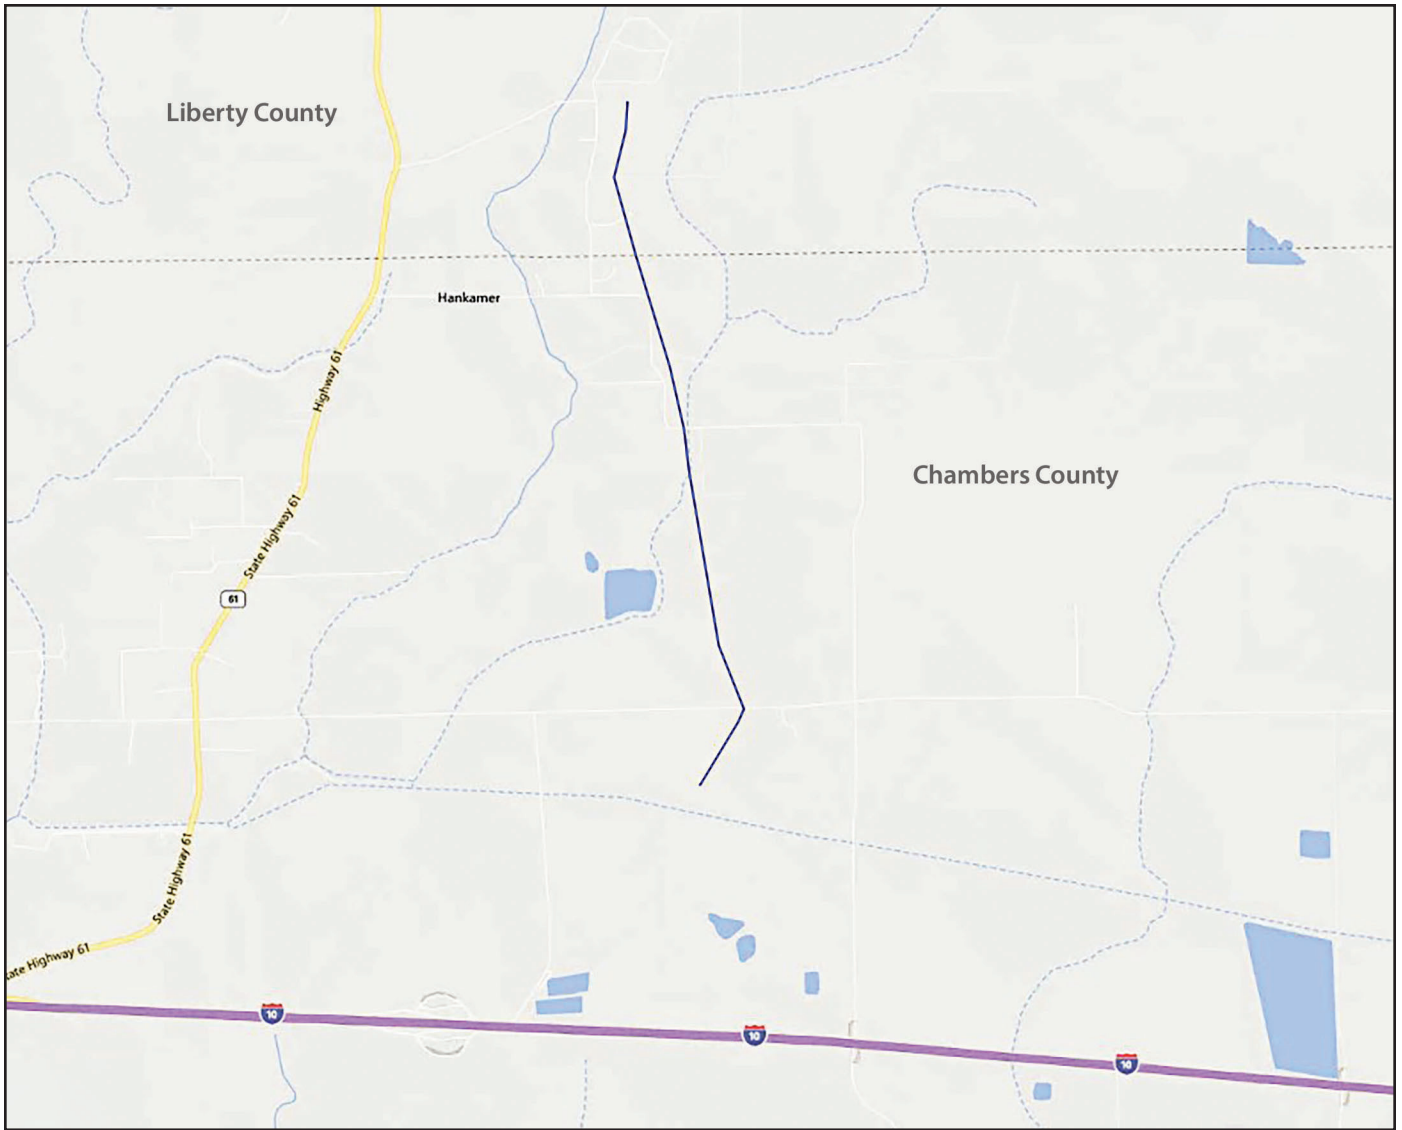

- Abandon any equipment being used in the area
- Move upwind of the product release
- Avoid open flames
- Avoid introducing any sources of ignition
- Do not start or turn off motor vehicles or electrical equipment
- Call our 24 hour emergency number and 911

PIPELINE MARKERS

PRODUCTS TRANSPORTED IN YOUR AREA

PRODUCT	LEAK TYPE	VAPORS
NATURAL GAS	Gas	Lighter than air and will generally rise and dissipate. May gather in a confined space and travel to a source of ignition.
HEALTH HAZARDS		Will be easily ignited by heat, sparks or flames and will form explosive mixtures with air. Vapors may cause dizziness or asphyxiation without warning and may be toxic if inhaled at high concentrations. Contact with gas or liquefied gas may cause burns, severe injury and/or frostbite.
