ABOUT JEWELS PIPELINE

Kaler Energy Corp. operates the Jewels 4.5" Pipeline located in League City, Texas. This gathering system delivers gas 2.41 miles from the Jewels production well to the Kinder Morgan interconnect.

WHAT DOES KALER ENERGY CORP DO IF A LEAK OCCURS?

To prepare for the event of a leak, pipeline companies regularly communicate, plan and train with local emergency responders. Upon the notification of an incident or leak the pipeline company will immediately dispatch trained personnel to assist emergency responders.

Pipeline operators and emergency responders are trained to protect life, property and facilities in the case of an emergency.

Pipeline operators will also take steps to minimize the amount of product that leaks out and to isolate the pipeline emergency.

MAINTAINING SAFETY AND INTEGRITY OF PIPELINES

Kaler Energy Corp invests significant time and capital maintaining the quality and integrity of their pipeline systems. Kaler Energy Corp actively participates in Texas811, a qualified one-call center. Kaler Energy Corp utilizes aerial surveillance and/or on-ground field personnel to identify potential dangers.

PRODUCTS/DOT GUIDEBOOK ID#/GUIDE#:
 Natural Gas 1971 115

TEXAS
COUNTIES OF OPERATION:
 Galveston

Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.

PRODUCTS TRANSPORTED IN YOUR AREA

PRODUCT	LEAK TYPE	VAPORS
NATURAL GAS	Gas	Lighter than air and will generally rise and dissipate. May gather in a confined space and travel to a source of ignition.
HEALTH HAZARDS		Will be easily ignited by heat, sparks or flames and will form explosive mixtures with air. Vapors may cause dizziness or asphyxiation without warning and may be toxic if inhaled at high concentrations. Contact with gas or liquefied gas may cause burns, severe injury and/or frostbite.
