

Formosa Plastics®

**WHO IS LAVACA PIPE LINE COMPANY**

Lavaca Pipe Line Company (LPL) operates 56.69 miles of intrastate natural gas pipeline and 65.74 miles of liquid intrastate pipeline in Calhoun and Jackson Counties.

**PIPELINE SAFETY**

System failures occur infrequently along the nation's network of interstate natural gas pipeline facilities, and many of these are caused by damage from others digging near the pipeline. LPL watches for unauthorized digging, but we request your help to notify us.

**ALWAYS CALL 811 BEFORE YOU DIG!**

**PIPELINE MARKERS**

Pipeline markers are used to indicate the approximate location of a natural gas/liquid pipeline and to provide contact information. Aerial patrol planes also use the marker to identify the pipeline route. Markers should never be removed or relocated by anyone other than a pipeline operator.

You can also find out where other companies' pipelines are in your area by going to the National Pipeline Mapping System website at [www.npms.phmsa.dot.gov](http://www.npms.phmsa.dot.gov).

If you encounter or observe any unusual or suspicious activity near our pipeline or pipeline facilities or in the event of an unlikely emergency event, please call us at anytime using one of our numbers listed in the document.

**WHAT ARE THE SIGNS OF A NATURAL GAS PIPELINE LEAK?**

- Blowing or hissing sound
- Dust blowing from a hole in the ground
- Continuous bubbling in wet or flooded areas
- Gaseous or hydrocarbon odor
- Dead or discolored vegetation in a green area
- Flames, if a leak has ignited

**WHAT SHOULD I DO IF I SUSPECT A PIPELINE LEAK?**

Your personal safety should be your first concern:

- Evacuate the area and prevent anyone from entering
- Abandon any equipment being used near the area
- Avoid any open flames
- Avoid introducing any sources of ignition to the area (such as cell phones, pagers, 2-way radios)
- Do not start/turn off motor vehicles/ electrical equipment
- Call 911 or contact local fire or law enforcement
