

OUR OPERATIONS

Safety, operational reliability and system integrity are the core of what we do.

We take many preventative measures to promote safe, reliable operations of our natural gas pipelines and related facilities, including:

- High-quality pipeline material, anti-corrosion coatings and cathodic protection (a low-level direct current to inhibit corrosion)
- Pressure testing of new and existing pipelines
- Inspection and preventative maintenance programs
- Monitoring of pipelines and related facilities
- Frequent aerial and periodic ground surveys of the right-of-way
- Remote control valves
- Emergency response preparedness training and drills for employees and third-party emergency responders

DELIVERING ENERGY FROM WELLHEAD TO MARKET

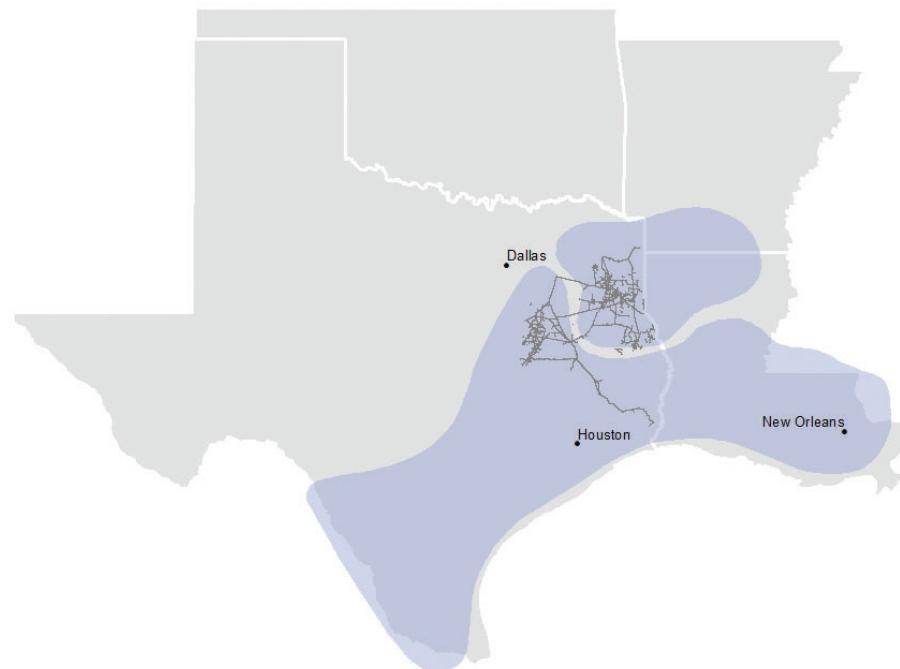

Momentum Midstream is a full-service natural gas and natural gas liquid (NGL) midstream business headquartered in Houston, Texas.

East Texas System

- 3,606 mi. of gathering and transmission pipe
- 6 processing plants 780mmscfd
- 14 treating plants 1570mmscfd
- 2 HCDP plants
- 2,350 mmscfd total volume

READY TO DIG?

Please call 811 to ensure your project is completed properly and safely.

The Momentum Midstream assets gather, treat, process and transport natural gas and NGLs. Momentum Midstream systems connect established and growing gas-producing Basins from the East Texas Basin to the Gulf Coast Basin.
