**John Hill**

5452 State Highway 158

Garden City, TX 79739

Phone: 432-413-7587

Website: www.medallionmidstream.com

**COMMITMENT**

Medallion Operating Company, LLC is committed to the protection of the public and the environment through the safe operation and maintenance of its pipeline systems. Medallion’s qualified personnel are trained in emergency response activities and regularly participate in drills and exercises reflecting various types of response levels, emergency scenarios, topographic terrain and environmental sensitivities.

Medallion has committed the necessary resources to fully prepare and implement its emergency response plans and has obtained through contract the necessary private personnel and equipment to respond, to the maximum extent practicable, to a “worst case” discharge or substantial threat of such a discharge.

**EMERGENCY RESPONSE CAPABILITIES**

**COMMUNICATIONS**

Medallion utilizes its 24-hour Pipeline Control Center as a hub of communications in emergency response situations. The Control Center has a vast catalog of resources and capabilities. Onsite communications are conducted using cellular telephones, portable satellite and/or land-line telephone systems from company facilities and offices.

**INCIDENT COMMAND SYSTEM**

Medallion employs an expandable Incident Command System. Depending upon the size and complexity of an incident, additional Company or contract personnel may be added as needed. Additional federal, state or local agencies may be integrated into the Incident Command System by utilizing a Unified Command Structure.

**SPILL RESPONSE EQUIPMENT**

Medallion maintains emergency response equipment at strategically located facilities. Equipment may include spill boom (of various types, sizes and lengths as needed in different areas), sorbent materials, boats, motors, hand tools, power tools, pumps, hoses, personal protective equipment, first aid and miscellaneous supplies.

**OIL SPILL CONTRACTORS**

Medallion contracts with Oil Spill Response Organizations (OSROs) and relies upon OSROs to aid in an appropriate level of response with spill response equipment and trained personnel.

**For more information regarding Medallion emergency response plans and procedures, call Toby Burgin, EHS & Regulatory Director at 469-262-6060(o).**

**EXCAVATOR/PUBLIC OFFICIALS**

Medallion operates crude oil, gas or natural gas liquids pipelines in your area of operations. Pipelines continue to be the safest means of energy transportation, and we rely your help to keep continue our safe operation. As we strive continually to improve the safety of our pipelines, we count on you for assistance. Here are some ways that you can help.

To view maps of our facilities visit our website, [www.medallionmidstream.com](http://www.medallionmidstream.com) or the National Pipeline Mapping System, [www.mpps.phmsa.dot.gov](http://www.mpps.phmsa.dot.gov).

**CALL BEFORE YOU DIG**

The main safety concern along any pipeline corridor is construction activity that can damage the pipeline. Construction activity can mean, homeowners doing their own landscaping, a paving project, a sewer repair, or a farmer deep plowing his field. A single phone call to the appropriate one-call system will help the excavator locate the underground facilities, which include lines for petroleum products, natural gas, electricity, phone, and cable.

State law requires excavators to utilize the One-Call system.

**National One Call Number: 811**

After receiving your call, **the One-Call Center** will notify companies with buried utilities near the impacted area.

Let us work together to provide a safe environment today and energy for the future.

**EMERGENCY CONTACT:**

**1-888-314-1527**

**PRODUCTS/ DOT GUIDEBOOK ID#/ GUIDE#:**

Crude Oil 1267 128

**TEXAS COUNTIES OF OPERATION:**

Crane	Midland	Scurry
Glasscock	Mitchell	Ward
Howard	Pecos	Upton
Irion	Reagan	
Martin	Reeves	

*Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.*

**CALL IF YOU SUSPECT A LEAK**

Signs of a possible leak include:

**Sight:** Accumulation of petroleum liquids on the ground or cloud or fog in the air

**Sound:** A pipeline leak may also be accompanied by a hissing or roaring sound

**Smell:** One of the indications of a leak may be the odor of escaping liquid petroleum. However, any strange or unusual smell in the proximity of pipelines may indicate a leak.

If you notice any of these in the vicinity of our facilities, please leave the area immediately then call our **24hr emergency number:**

**888-314-1527** - Medallion Midland Crude Oil Gathering

**844-641-5915** - Medallion Delaware Crude Oil Gathering

If you damage an underground pipeline in the state of Texas, you must report it to the operator immediately and to the Texas Railroad Commission via their website within 30 days <http://webapps.rrc.texas.gov/TPD/publicHomeAction.do>.
