ABOUT MONUMENT PIPELINE, LP

Monument Pipeline is composed of 240 miles of pipe ranging from 3” to 18” transporting Natural Gas through six counties stretching from the City of Pinehurst to Santa Fe, up to Pasadena, Deer Park, La Porte and Clear Lake.

WHAT DOES MONUMENT PIPELINE, LP DO IF A LEAK OCCURS?

Monument Pipeline, LP has main line block valves on all their system. They are spaced according to PHMSA requirements. If a leak occurs, it is immediately isolated and a report is filed within 2 hrs to state and federal agencies.

MAINTAINING SAFETY AND INTEGRITY OF PIPELINES

Monument Pipeline, LP invests significant time and capital maintaining the quality and integrity of their pipeline systems. Most active pipelines are monitored 24 hours a day via manned control centers. Monument Pipeline, LP also utilizes aerial surveillance and/or on-ground observers to identify potential dangers. Control center personnel continually monitor the pipeline system and assess changes in pressure and flow. They notify field personnel if there is a possibility of a leak. Automatic shut-off valves are sometimes utilized to isolate a leak.

Gas transmission and hazardous liquid pipeline operators have developed supplemental hazard and assessment programs known as Integrity Management Programs (IMPs). Specific information about Monument Pipeline, LP’s program may be found on the PHMSA web site, or by contacting us directly.

HOW TO GET ADDITIONAL INFORMATION

For more information or a copy of our Damage Prevention, Emergency Response, or Integrity Management plans, please contact (346) 803-4265.

PRODUCTS/DOT GUIDEBOOK ID#/GUIDE#:		
Natural Gas	1971	115

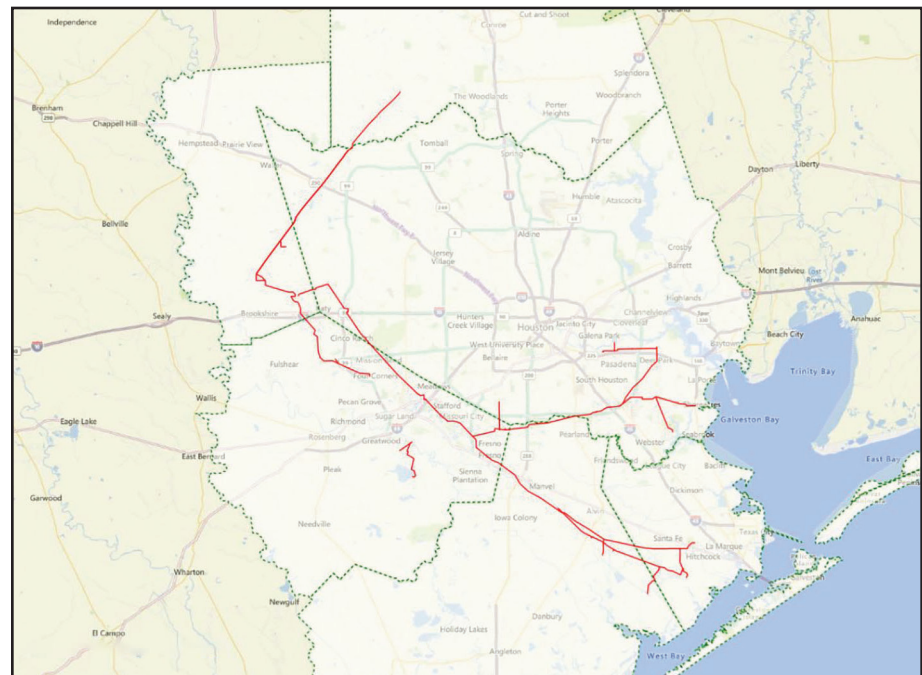

TEXAS COUNTIES OF OPERATION:

Brazoria	Harris
Fort Bend	Montgomery
Galveston	Waller

Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.

PRODUCTS TRANSPORTED IN YOUR AREA

PRODUCT	LEAK TYPE	VAPORS
NATURAL GAS	Gas	Lighter than air and will generally rise and dissipate. May gather in a confined space and travel to a source of ignition.
HEALTH HAZARDS		Will be easily ignited by heat, sparks or flames and will form explosive mixtures with air. Vapors may cause dizziness or asphyxiation without warning and may be toxic if inhaled at high concentrations. Contact with gas or liquefied gas may cause burns, severe injury and/or frostbite.
