OUR OPERATIONS

Producers Midstream is a full-service natural gas and natural gas liquid (NGL) midstream business committed to maximizing the value of our producer's operations by creating a system of increased reliability and predictability, supported by our culture of service, ingenuity, and responsiveness. Producers Midstream is headquartered in Dallas, Texas.

We take many preventative measures to promote safe, reliable operations of our natural gas pipelines and related facilities, including:

- High-quality pipeline material, anti-corrosion coatings and cathodic protection (a low-level direct current to inhibit corrosion)
- Pressure testing of new and existing pipelines
- Inspection and preventative maintenance programs
- Monitoring of pipelines and related facilities
- Frequent aerial and periodic ground surveys of the right-of-way
- Remote control valves
- Emergency response preparedness training and drills for employees and third-party emergency responders
- Active Integrity Management Program

PALO DURO MIDSTREAM SYSTEM

- 3,300 miles of gathering and transmission pipe
- 7 processing plants
- 1 treatment plant
- 930 mmcf/d processing capacity
- Emergency Contact: 806-495-8040

TEXAS EXPRESS GATHERING

- 138 miles of natural gas liquids lines
- 280,000 barrels per day capacity
- Emergency Contact: 806-495-8040

SCURRY MIDSTREAM SYSTEM

- 150+ miles of gathering and transmission pipe
- 1 processing plant
- 60 mmcf/d processing cap
- Emergency Contact: 325-766-0555

Producers Midstream

This segment involves our three systems - Anadarko, Permian, and North Texas - for gathering, treating, processing and transporting natural gas and NGLs. They connect established and growing gas-producing regions in Texas and Oklahoma.
