- Notify corporate management as appropriate as well as the Safety/ Environmental Specialist

**SECURE SITE**

- Control traffic
- Set up safe perimeter/evaluate wind (use gas detection meter)
- Cooperate with law enforcement and appropriate agencies
- Refer media to spokesperson

**MAINTAINING SAFETY AND INTEGRITY OF PIPELINES**

The San Antonio Refinery, LLC invests significant time and capital maintaining the quality and integrity of their pipeline system. Active pipelines are monitored 24 hours a day via manned control centers.

The San Antonio Refinery, LLC actively participates in Texas811, a qualified one-call center. The San Antonio Refinery, LLC also utilizes aerial surveillance and/or on-ground observers to identify potential dangers. Control center personnel continually monitor the pipeline system and assess changes in pressure and flow. They notify field personnel if there is a possibility of a leak. Automatic shut-off valves are sometimes utilized to isolate a leak.

For more information on affected HCA segments or TSAR's Integrity Management Plan please contact Rolando Ayala at [rolando.ayala@lazarus-tsar.com](mailto:rolando.ayala@lazarus-tsar.com).
