Denver | CO | 80202

Emergency Phone: 1-432-273-0009

Non-Emergency Contact: bpDamagePrevention@bp.com

Website: www.bp.com

**COMPANY PROFILE**

With operations in Texas and Louisiana, our US onshore business – bpx energy – has become both a premier oil and gas producer and a leader in reducing methane emissions. This reflects bp’s global strategy of producing some of the most resilient hydrocarbons.

**COMMITMENT TO SAFETY, HEALTH AND ENVIRONMENT**

Safety is the foundation of everything bpx energy does, every single day. Its goals are clear: no accidents, no harm to people and no damage to the environment. That’s a huge responsibility — one bpx energy does not take for granted.

Doing the right thing is not always easy, but it is vital. We conduct our business safely, sustainably and with a non-negotiable commitment to ethics and compliance. Complacency undermines safety, which is why bpx energy is working every day to become even better, even safer. Even as bpx energy has prepared to respond to an accident, it also has worked hard to ensure that such a response is never needed.

Among its many initiatives are:

- Visual inspections of bpx energy’s pipeline right-of-ways are conducted by airplanes, drones and/or ground patrols.
- Above ground marker signs are displayed along the right-of-ways to alert the public and contractors to the existence of our pipelines.
- Internal pipeline inspections are conducted periodically by sophisticated computerized equipment called “smart pigs”.
- Cathodic Protection on our pipelines protects them from external corrosion through the use of an electrostatic current.

- bpx energy is member of the “one-call” systems in every state in which we have pipeline facilities within.
- Emergency preparedness and planning measures are in place at bpx energy in the event that a pipeline incident occurs. The company also works closely with local emergency response organizations to educate them regarding our pipelines and how to respond in the unlikely event of an emergency. For more information regarding bpx energy’s emergency response plans and procedures, contact us at bpDamagePrevention@bp.com
- You can find out where our pipelines and other companies’ pipelines are in your area by going to the National Pipeline Mapping System website at www.npms.phmsa.dot.gov.
