

TC Energy operates one of the most sophisticated pipeline systems in the world. Our network of more than 56,000 miles of natural gas pipelines connect virtually every major natural gas supply basin and market, transporting 25% of the natural gas consumed in North America.

You may obtain access to view maps for TC Energy GTN facilities by following the instructions at:

<http://www.npms.phmsa.dot.gov>

For more detailed information on TC Energy's GTN Pipeline facilities, please use the Public Awareness contact information below.

<i>Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.</i>		

TC Energy GTN System Pipeline Markers and Signs

Right of Way Signs

A. Pipeline Markers are placed along the Right of Way, at Road Crossings, at Railroad Crossings and where each pipeline enters or leaves a fenced facility. Pipeline markers similar to these shown below are located above and near the pipe centerline. They display the name of the operator, product and emergency contact number.

- Marker signs may be attached to fence posts or to facility fencing.
- Marker "bullet" post may be placed over metal fence post or stand alone.
- Marker "slat" post may be used in lieu of either above marker type.

MARKER SIGNS

MARKER "BULLET" POST

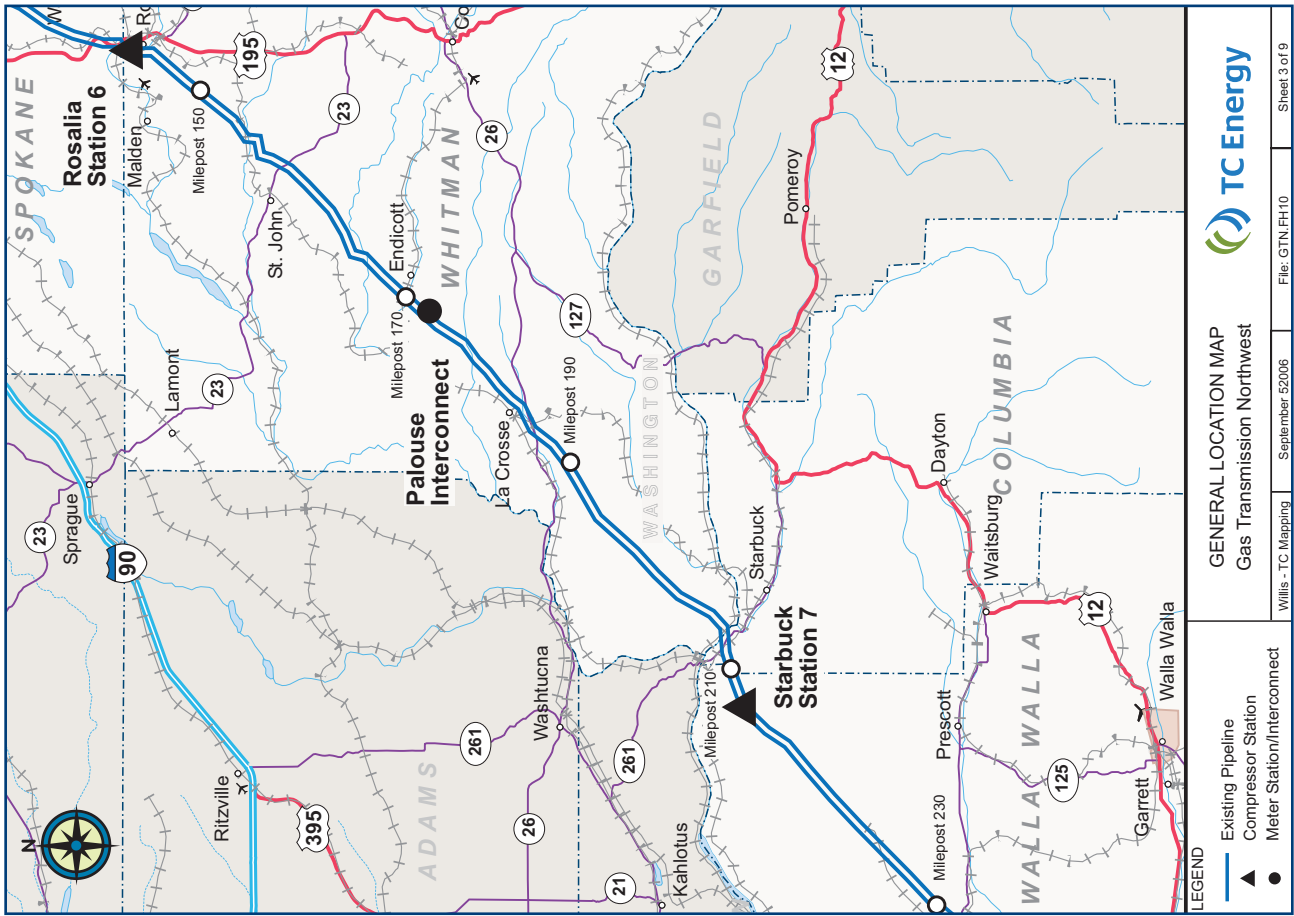

MARKER "SLAT" POST

Facility Markers

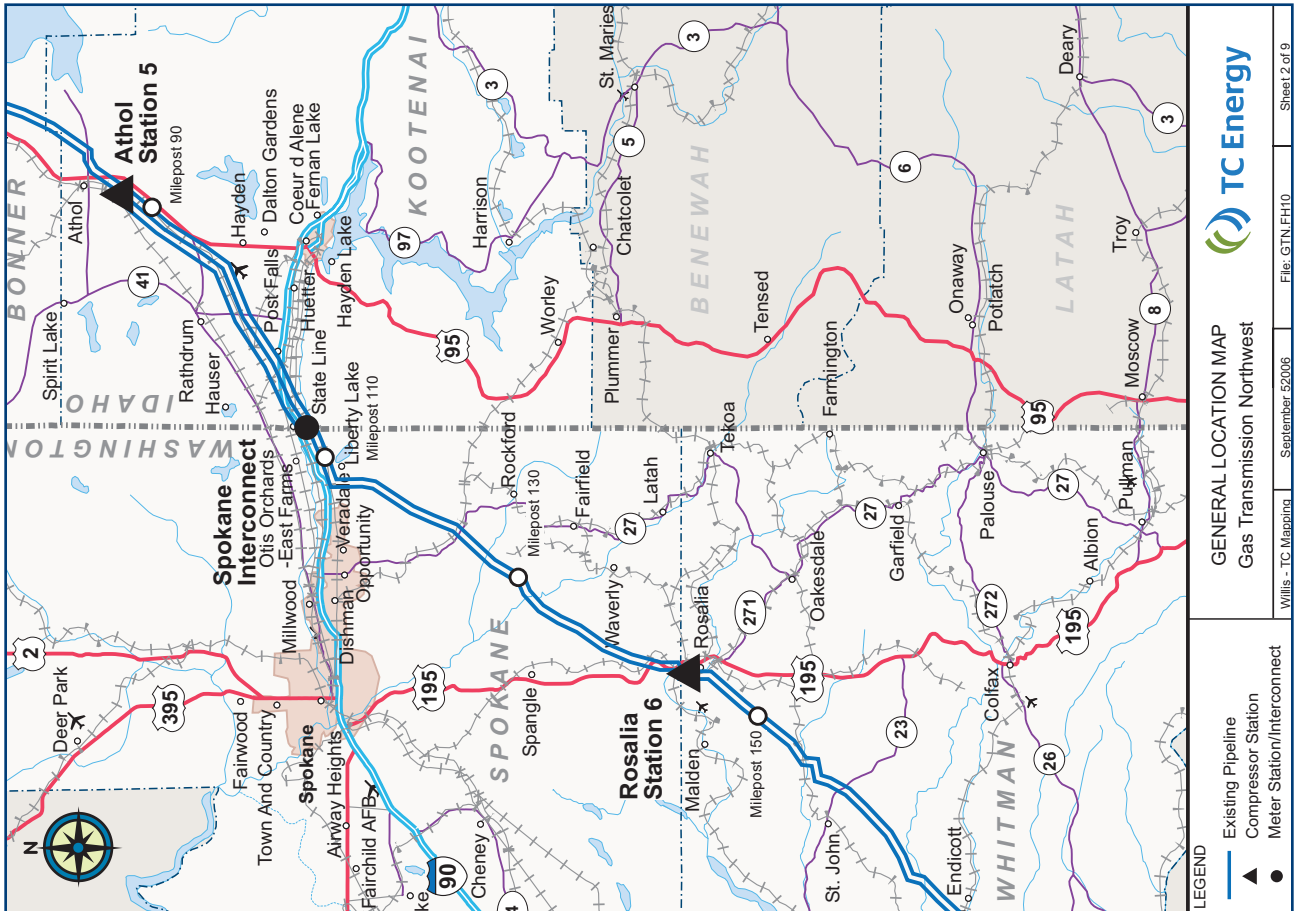

B. Danger signs are located along the perimeter of gas facilities, and at roadway entrance gates. These signs are to warn visitors and inform Emergency Responders of high pressure natural gas precautions.
