ABOUT ANTERO MIDSTREAM

Headquartered in Denver, Colorado, Antero Midstream Corporation (NYSE:AM) is a growth-oriented limited partnership formed by Antero Resources Corporation (NYSE:AR) to own, operate and develop midstream energy assets to service Antero Resources' rapidly increasing production. Our assets consist of gathering pipelines and compressor stations, through which we provide midstream services to Antero Resources. Our assets are located in the rapidly developing liquids-rich southwestern core of the Marcellus Shale in northwest West Virginia and liquids-rich core of the Utica Shale in southern Ohio.

COMMITMENT TO SAFETY, HEALTH AND ENVIRONMENT

Antero Midstream is committed to operational safety and environmental stewardship. As we strive to protect the natural environment and minimize the impact of our operations, Antero Midstream pipeline is buried underground and identified by marked rights-of-way. Visit Pipeline Safety to learn more about Antero Midstream's efforts to ensure the safety and protection of the communities in which we live, work and operate.

PIPELINE SAFETY

System failures occur infrequently along the nation's network of interstate natural gas pipeline facilities, and many of these are caused by damage from others digging near the pipeline. We watch for unauthorized digging, but we request your help too.

We participate in One-Call Centers and strongly encourage those who are going to dig to call their state One-Call Center or the 811 "Call before you dig" hotline (see below) to allow pipeline companies and owners of other buried utilities a chance to mark the underground facilities in the area before digging begins.

WHAT ARE THE SIGNS OF A NATURAL GAS PIPELINE LEAK?

- Blowing or hissing sound
- Dust blowing from a hole in the ground
- Continuous bubbling in wet or flooded areas
- Gaseous or hydrocarbon odor
- Dead or discolored vegetation in a green area
- Flames, if a leak has ignited

WHAT SHOULD I DO IF I SUSPECT A PIPELINE LEAK?

Your personal safety should be your first concern:

- Avoid any open flames
- Avoid introducing any sources of ignition to the area (such as cell phones, pagers, 2-way radios)
- Do not start/turn off motor vehicles/ electrical equipment
- Call 911 or contact local fire or law enforcement

EMERGENCY CONTACT:
1-800-265-6503

PRODUCTS/ DOT GUIDEBOOK ID#/ GUIDE#:

Natural Gas	1971	115

WEST VIRGINIA COUNTIES OF OPERATION:

Doddridge	Tyler
Harrison	Wetzel
Ritchie	

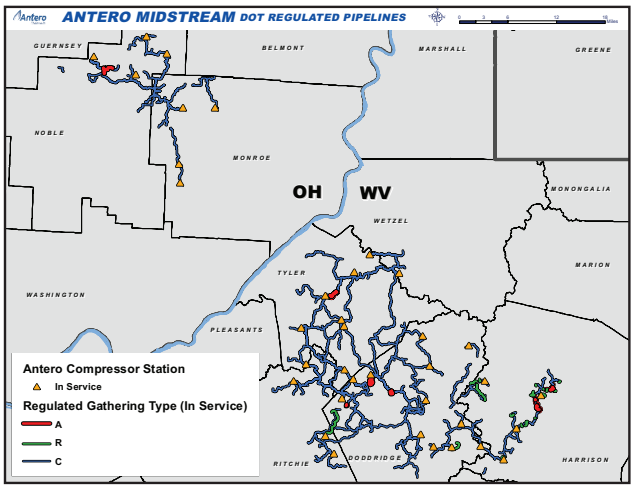
Changes may occur. Contact the operator to discuss their pipeline systems and areas of operation.

- Notify Antero Midstream at 800-265-6503
- Do not attempt to extinguish a natural gas fire
- Do not attempt to operate any pipeline valves
- Evacuate the area and prevent anyone from entering
- Abandon any equipment being used near the area

PIPELINE LOCATION AND MARKERS

Pipeline markers are used to indicate the approximate location of a natural gas pipeline and to provide contact information. Aerial patrol planes also use the markers to identify the pipeline route. Markers should never be removed or relocated by anyone other than a pipeline operator.

You can also find out where other companies' pipelines are in your area by going to the National Pipeline Mapping System website at www.npms.phmsa. dot.gov.

EMERGENCY RESPONSE PLANS


An Emergency Response Plan is developed for each pipeline facility to contain, control and mitigate the various types of emergency conditions/situations that could occur at one of our facilities. For more information regarding Antero Midstream Corporation's emergency response plans and procedures, contact us directly.
