Tennessee Gas Pipeline is one of the interstate pipelines that make up Kinder Morgan Corporation. Tennessee Gas Pipeline is comprised of approximately 14,200 miles and 1.4mm certificated horsepower. The pipeline stretches from the Mexican border to Canada. Tapping supply regions in the Gulf of Mexico, Texas, Appalachia, and Canada, the Tennessee system serves markets across the Midwest and mid-Atlantic regions, including major metropolitan centers such as Chicago, New York, and Boston.

Tennessee's assets are placed ideally to take advantage of new natural gas supplies from Canada, including Nova Scotia, and emerging liquefied natural gas (LNG) projects along the Gulf Coast and Eastern Seaboard. Additionally,

the company is poised for continued growth as new natural gas-fired power generation facilities are built to meet the increasing electricity demand along its pipeline route. Well connected, Tennessee has more than 100 interconnects with most major interstate and intrastate pipeline systems serving the Midwest, Northeast, mid-Atlantic, and southeastern United States.

Offering long-term growth options and continued rate stability, Tennessee is prepared to meet the demands of a growing market with the integrity and commitment to service that have made it one of the safest and most reliable pipelines in the United States.
